# Independent Auditor's Report

AM/003305

To the Shareholders of
Arab Banking Corporation
(A Public Shareholding Limited Company)
Amman – The Hashemite Kingdom of Jordan

## Report on the Audit of the Consolidated Financial Statements

### Opinion

We have audited the consolidated financial statements of Arab Banking Corporation (Jordan) (the "Bank") and its subsidiary (the "Group"), which comprise the consolidated statement of financial position as of December 31, 2023, and the consolidated statement of profit or loss, consolidated statement of comprehensive income, consolidated statement of changes in owners' equity and consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2023, and its financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) as adopted by the Central Bank of Jordan.

### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards, are further described in the "Auditor's Responsibilities for the Audit of the consolidated Financial Statements" section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants together with the ethical requirements that are relevant to our audit of the Bank's consolidated financial statements in Jordan, and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Description of the manner of examine of each item below is provided within the audit procedures:

| Key Audit Matters | How our audit addressed the key audit matter |
|---|---|
| **1. Allowance for Credit Losses on Credit Facilities**<br>As described in Notes 8 to the consolidated financial statements, the Bank had direct credit facilities of JD 763 million as of December 31, 2023 representing 55% of total assets. The total allowance for expected credit losses relating to these facilities was JD 68 million. The determination of the Banks's expected credit losses for credit facilities is a material and complex estimate requiring significant management judgement in the evaluation of the credit quality and the estimation of inherent losses in the portfolio.<br><br>The financial statement risk arises from several aspects requiring substantial judgement of management, such as the estimation of probabilities of default and loss given defaults for various stages, the determination of significant increase in credit risk (SICR) and credit-impairment status (default), the use of different modelling techniques and consideration of manual adjustments. In calculating expected credit losses, the bank considered credit quality indicators for each loan and portfolio, stratifies loans and advances by risk grade and estimates losses for each loan based upon their nature and risk profile.<br><br>The Bank's expected credit losses are calculated against credit exposures, according to the requirements of International Financial Reporting Standard 9 Financial Instruments (IFRS 9) as adopted by the Central Bank of Jordan (CBJ). Credit exposures granted directly to the Jordanian Government as well as credit exposures guaranteed by the Jordanian Government are excluded from the determination of the allowance for expected credit losses. In addition, expected credit losses are also adjusted to take into consideration any special arrangements with the Central Bank of Jordan. | We established an audit approach, which includes both testing the design and assessed the operating effectiveness of certain relevant internal controls, over the determination of expected credit losses and risk-based substantive audit procedures. Our procedures over internal controls focused on obtaining an understanding and testing the design and implementation over the process controls around the ECL methodology governance, completeness and accuracy of loan data used in the expected loss models, management review of outcomes, the assignment of borrowers' risk classification, consistency of application of accounting policies and the process for calculating allowances.<br><br>The primary procedures which we performed to address this key audit matter included, but were not limited to, the following:<br><br>• For a risk-based sample of individual loans, we performed a detailed credit review, assessed the appropriateness of information for evaluating the creditworthiness and staging classification of individual borrowers and challenged the assumptions underlying the expected credit loss allowance calculations, such as estimated future cash flows, collateral valuations and estimates of recovery. We assessed the consistency of the bank's application of its impairment allowances and governance controls, including assessing key management and committee meetings that form part of the approval process for loan impairment allowances. |

The recognition of specific allowances on impaired facilities under the CBJ instructions is based on the rules prescribed by the CBJ on the minimum allowances to be recognized together with any additional allowances to be recognized based on management's estimate of expected cash flows related to those credit facilities.

In calculating expected credit losses, the Bank considered credit quality indicators for each loan and portfolio, stratified credit facilities by risk grades and estimated losses for each facility based upon their nature and risk profile. Auditing these complex judgements and assumptions involves especially challenging auditor judgement due to the nature and extent of audit evidence and effort required to address these matters and therefore this item is considered to be a key audit matter.

- For loans not tested individually, with the assistance of our subject matter experts, we assessed the methodology used to determine the expected credit losses, tested the inputs by agreeing these to supporting documentation, and reperformed the mathematical accuracy of the expected credit loss model. We also challenged key assumptions, inspect the calculation methodology and trace a sample back to source data;

- We evaluated key assumptions such as thresholds used to determine SICR and forward-looking macroeconomic scenarios including the related weighting;

- We evaluated post-model adjustments and management overlays in the context of key model and data limitations identified by the Bank in order to assess these adjustments, and
challenged their rationale;

- We assessed the forward- looking information incorporated into the impairment calculations by involving our specialist to challenge the multiple economic scenarios chosen including the related weighting applied and reconciled the macroeconomic indicators with the respective sources used; and

- We determined if the amount recorded as the allowance for expected credit losses was determined in accordance with the instructions of the Central Bank of Jordan

- We assessed the disclosure in the consolidated financial statements relating to this matter against the requirements of IFRSs.

| Key Audit Matters | How our audit addressed the key audit matter |
|---|---|
| IT systems and controls over financial reporting<br><br>We identified IT systems and controls over the Bank's financial reporting as an area of focus due to the extensive volume and variety of transactions which are processed daily by the Bank and rely on the effective operation of automated and IT dependent manual controls.<br><br>There is a risk that automated accounting procedures and related internal controls are not accurately designed and operating effectively. In particular, the incorporated relevant controls are essential to limit the potential for fraud and error as a result of change to an application or underlying data.<br><br>Unauthorised or extensive access rights cause a risk of intended or unintended manipulation of data that could have a material effect on the completeness and accuracy of financial statements. Therefore, we considered this area as key audit matter. | Our audit approach relies on automated controls and therefore the following procedures were designed to test access and control over IT systems:<br>We obtained an understanding of the applications relevant to financial reporting and the infrastructure supporting these applications.<br><br>We tested IT general controls relevant to automated controls and computer-generated information covering access security, program changes, data center and network operations.<br><br>We examined computer generated information used in financial reports from relevant applications and key controls over their report logics.<br><br>We performed testing on the key automated controls on significant IT systems relevant to business processes. |

**Other Matter**

The accompanying consolidated financial statements are a translation of the original consolidated financial statements, which are in the Arabic language, to which reference should be made.

**Other Information**

Management is responsible for other information. The other information comprises the other information in the annual report, excluding the consolidated financial statements and the independent auditors' report thereon. We expect that the annual report will be made available to us after the date of our audit report. Our opinion on the consolidated financial statements does not cover the other information, and we do not express any form of assurance or conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

**Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs as adopted by the Central Bank of Jordan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

**Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exist. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exist, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards procedures.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period, and are therefore the key audit matters. We describe these matters in our auditor's report, unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonable be expected to outweigh the public interest benefits of such communication.

**Report on Other Legal and Regulatory Requirements**
The Bank maintains proper books of accounts which are in agreement with the consolidated financial statements and we recommend that the General Assembly of the Shareholders to approve these consolidated financial statements.

THE ACCOMPANYING NOTES FROM (1) TO (47) CONSTITUTE AN INTEGRAL PART OF THESE CONSOLIDATED FINANCIAL STATEMENTS AND SHOULD BE READ WITH THEM AND WITH THE AUDIT REPORT.

## 1. General Information

Arab Banking Corporation (Jordan) was established as a public shareholding limited company on 21 January 1990, in accordance with the Companies Law No (1) of 1989, with headquarters in Amman.

The Bank provides banking services through its head office in Amman and its 23 branches and office in Jordan and the subsidiary company.

The Bank's shares are listed on Amman Stock Exchange.

The financial statements of the Bank and its subsidiary "the Group" are consolidated in the Arab Banking Corporation – Bahrain financial statements.

The consolidated financial statements have been approved by the Board of Directors of the Group on February 14, 2024 and are subject to the approval of the Shareholders General Assembly and the approval of the Central Bank of Jordan.

## 2. Information about Material Accounting Policies:

### Basis of Consolidated Financial Statements Preparation

- The accompanying consolidated financial statements of the Bank and its subsidiary are prepared in accordance with the International Accounting Standards Board (IASB), the interpretations issued by the International Financial Reporting Interpretation Committee of the IASB, as adopted by the Central Bank of Jordan.

  The main differences between the IFRSs as they should be applied and what has been approved by the Central Bank of Jordan are as follows:

  a. Provisions for expected credit losses are calculated in accordance with IFRS (9) and the Central Bank of Jordan's, whichever is tougher. The material differences are as follows:

     - Exempt debt instruments and any other credit exposures issued or guaranteed by the Jordanian government, in addition to any other credit exposures with the Jordanian Government or its guarantee, so that credit exposures is treated on the Jordanian Government and by its guarantee without credit losses.

     - When calculating the credit losses against credit exposures, the calculation results according to IFRS (9) are compared with those according to the Central Bank of Jordan's Instructions No. (2009/47) dated December 10, 2009 for each stage separately and the toughest results are taken.

     - In some special cases Central Bank of Jordan agrees on special arrangements related to the calculation of the expected credit losses' provision of direct credit facilities customers over the determined period.

     - Exempt facilities related to governmental projects outcomes (transfers of Governmental dues) from classifications when calculating provisions.

  b. Interest and commissions are suspended on non-performing credit facilities granted to customers, in accordance with the instructions of the Central Bank of Jordan.

c. Assets foreclosed to the Bank are shown in the consolidated statement of financial position, among other assets at their current value when it foreclosed to the Bank or at their fair value, whichever is lower. Furthermore, they are revaluated on the date of the consolidated financial statements separately, and any decrease in its value is recorded in the consolidated statement of profit or loss and consolidated comprehensive income while no increase in its value is recorded as revenue, in which, any subsequent increase is taken to the consolidated statement of profit or loss and other comprehensive income to the extent of not exceeding the previously recorded impairment value. In accordance with central Bank of Jordan's generalization (10/3/16234) dated October 10, 2022 the calculation of the gradual provision for the foreclosed assets against debts has been suspended. Provided that the allocated provisions for the expropriated foreclosed assets in violation of the terms included in the banking low maintained, and that only the allocated provision is released against any of the violating real estate that are disposed of.

- The consolidated financial statements are prepared under the historical cost convention, except for financial assets and liabilities at fair value through profit or loss, financial assets at fair value through other comprehensive income, and financial derivatives stated at fair value as of the date of the consolidated financial statements. Furthermore, hedged financial assets and financial liabilities are stated at fair value.

- The reporting currency of the consolidated financial statements is the Jordanian Dinar, which is the functional currency of the Bank.

- The accounting policies adopted in preparing the consolidated financial statements are consistent with those applied in the year ended December 31, 2022, except for the effect of what is stated in Note (3 – (A) & (B)).

- <u>Basis of Consolidation of the Financial Statements</u>
- The accompanying consolidated financial statements include the financial statements of the Bank and the subsidiary under its control. Moreover, control is achieved when the Bank has the ability to control the investee company, the company is exposed to variable returns or has rights to participate in the investee company, and the Bank is able to use its authority over the investee company, which affects its revenue.

- The Bank reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control listed above.

- When the Bank has less than the majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. In this regard, the Bank considers all relevant facts and circumstances in assessing whether or not the Bank's voting rights in an investee are sufficient to give it power, including:

• The size of the Bank's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
• Potential voting rights held by the Bank;
• Rights arising from other contractual arrangements; and
• Any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

- Transactions, balances, revenues and expenses are eliminated between the Bank and the subsidiary.

- The financial statements of the subsidiary are prepared for the same financial year, using the same accounting policies adopted by the Bank. If the accounting policies adopted by the company are different from those used by the Bank, the necessary adjustments to the financial statements of the subsidiary are made to comply with the accounting policies followed by the Bank.

- The results of the subsidiary are incorporated into the consolidated statement of Profit or Loss from the effective date of acquisition, which is the date on which actual control over the subsidiaries is assumed by the Bank. Moreover, the operating results of the disposed-of subsidiary are incorporated into the consolidated statement of Profit or Loss up to the effective date of disposal, which is the date on which the Bank loses control over its subsidiary.

- Non-controlling interests represent that part of the equity that is not owned by the Bank. Non-controlling interests in the net assets of the subsidiary are presented separately in the Bank's statement of equity.

The Bank’s subsidiary as of December 31, 2023 represents the following:

- <u>Arab Co-operation for Financial Investments (ABCI)</u>

Arab Co-operation for Financial Investments is wholly owned by the Bank, and its objective is to carry out brokerage investments on behalf of its clients, in addition to providing financial consultation services on stock exchange investing, its paid-up capital amounted to JD 15,600,000. Its total assets amounted to JD 43,347,651 and total liabilities to JD 18,538,622 as of December 31, 2023. Its total revenues amounted to JD 4,343,973 and total expenses to JD 4,040,267, for the year ended December 31, 2023, before excluding any transactions, balances, revenues, and expenses between the Company and the Bank.

Control is achieved when the Bank:

- Has the power over the investee;
- Is exposed, or has rights, to variable returns from its involvement with the investee; and
- Has the ability to use its power to affect the investee’s returns.

The Bank reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control listed above.

When the Bank has less than the majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. In this regard, the Bank considers all relevant facts and circumstances in assessing whether or not the Bank’s voting rights in an investee are sufficient to give its power. Among these facts and circumstances are:

- The size of the Bank’s holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- Potential voting rights held by the Bank, other vote holders, or other parties;
- Rights arising from other contractual arrangements; and
- Any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous general assembly’s meetings.

When the Bank loses control of the subsidiary, the Bank performs the following:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary.
- Derecognizes the book value of any non-controlling interests.
- Derecognizes the transfer difference accumulated in Owners' Equity.
- Derecognizes the fair value to the next controlling party.
- Derecognizes the fair value of any investment retained.
- Derecognizes any gain or loss in the Profit or Loss statement.
- Reclassifies owners' equity already booked in other comprehensive income to the profit or loss statement, as appropriate.

The subsidiaries' financial statements are prepared under the same accounting policies adopted by the Bank. If the subsidiaries apply different accounting policies than those used by the Bank, the necessary modifications shall be made to the subsidiaries' financial statements to make them comply with the accounting policies used by the Bank.

The non-controlling interests represent the portion not owned by the Bank relating to ownership of the subsidiaries.

Segment Information

- Business sectors represent a group of assets and operations that jointly provide products or services subject to risks and returns different from those of other business sectors which are measured in accordance with the reports used by the executive management and the key decision maker at the Bank.

- The geographical sector relates to providing products or services in a specific economic environment subject to risk and returns different from those of sectors functioning in other economic environments.

Net Interest Income

Interest income and expense for all financial instruments, except for those classified as held for trading, or those measured or designated as at fair value through the consolidated statement of Profit or Loss, are recognized in 'Net Interest Income' as 'Interest Income' and 'Interest Expense' in the statement of Profit or Loss using the effective interest method. Interest on financial instruments measured as at fair value through the consolidated statement of Profit or Loss is included within the fair value movement during the year.

The effective interest rate (EIR) is the rate that exactly discounts the estimated future cash flows of the financial instrument through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. The future cash flows are estimated, taking into account all the contractual terms of the instrument.

The interest income/ interest expense is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e. at the amortized cost of the financial asset before adjusting for any expected credit loss allowance), or to the amortized cost of financial liabilities. For credit-impaired financial assets, the interest income is calculated by applying the EIR to the amortized cost of the credit-impaired financial assets (i.e. the gross carrying amount less the allowance for expected credit losses (ECLs)). For financial assets originated or purchased credit-impaired (POCI), the EIR reflects the ECLs in determining the future cash flows expected to be received from the financial asset.

Interest income and expense in the Bank's consolidated statement of Profit or Loss also includes the effective portion of fair value changes of derivatives designated as hedging instruments in cash flow hedges of interest rate risk. For fair value hedges of interest rate risk related to interest income and expense, the effective portion of the fair value changes of the designated derivatives, as well as the fair value changes of the designated risk of the hedged item, are also included in interest income and expense.

<u>Net commission income</u>
Fees and commission income and expense include fees other than those that are an integral part of EIR. The fees stated in this part of the Group's consolidated statement of Profit or Loss include, among other things, fees charged for servicing a loan, non-utilization fees relating to loan commitments when it is unlikely that these will result in a specific lending arrangement, and loan syndication fees.

Fees and commission expenses concerning services are accounted for as the services are received.

<u>Dividend Income</u>
Dividend income is recognized when the right to receive payment is established. This is the ex-dividend date for listed equity securities, and usually the date when shareholders approve the dividend for unlisted equity securities.

The presentation of dividend income in the consolidated statement of Profit or Loss depends on the classification and measurement of the equity investment:

- For equity instruments which are held for trading, dividend income is presented in the statement of Profit or loss within gain (loss) of the financial assets at fair value through profit or loss;
- For equity instruments designated at fair value through other comprehensive income, dividend income is presented in the statement of Profit or loss within dividends from financial assets through OCI; and
- For equity instruments not designated at fair value through other comprehensive income and not held for trading, dividend income is presented as net income from other instruments at fair value through the statement of Profit or Loss.

<u>Financial Instruments</u>
Initial Recognition and measurement:
Financial assets and financial liabilities are recognized in the Bank's consolidated statement of financial position when the Bank becomes a party to the contractual provisions of the instrument, customers loans and facilities are recognized once they are recorded to the customer's account.

Recognized financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through the statement of Profit or Loss) are added to, or deducted from, the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through the statement of Profit or Loss are recognized immediately in profit or loss.

If the transaction price differs from the fair value at initial recognition, the Bank will account for such difference as follows:

- If fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets, then the difference is recognized in the statement of Profit or Loss on initial recognition (i.e. day 1 profit or loss); and

- In all other cases, the fair value will be adjusted to bring it in line with the transaction price (i.e. day 1 profit or loss will be deferred by including it in the initial carrying amount of the asset or liability).

After initial recognition, the deferred gain or loss will be released to the statement of Profit or Loss on a rational basis, only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability or when derecognizing the instruments.

Financial Assets

Initial Recognition:

All financial assets are recognized on the trading date when the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned. They are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through the statement of Profit or Loss. Transaction costs directly attributable to the acquisition of financial assets classified as at fair value through the statement of Profit or Loss are recognized immediately in the consolidated statement of Profit or Loss.

Subsequent Measurement

All recognized financial assets that are within the scope of IFRS (9) are required to be subsequently measured at amortized cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. Specifically:

- Debt instruments held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI), are subsequently measured at amortized cost;

- Debt instruments held within a business model whose objective is both to collect the contractual cash flows and to sell the debt instruments, and that have contractual cash flows that are SPPI, are subsequently measured at fair value through other comprehensive income; and

- All other debt instruments (e.g. debt instruments managed on a fair value basis, or held for sale) and equity investments are subsequently measured at fair value through the statement of Profit or Loss.

However, the Bank may irrevocably make the following selection /designation at initial recognition of a financial asset on an asset- by-asset basis:

- The Bank may irrevocably select to present subsequent changes in fair value of an equity investment that is neither held for trading nor for contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, in other comprehensive income; and

- The Bank may irrevocably designate a debt instrument that meets the amortized cost or fair value through other comprehensive income criteria as measured at fair value through the statement of Profit or Loss, if doing so eliminates or significantly reduces an accounting mismatch (referred to as the fair value option).

Debt Instruments at Amortized Cost or at Fair Value through Other Comprehensive Income

The Bank assesses the classification and measurement of a financial asset based on the contractual cash flow characteristics of the asset and the Bank's business model for managing the asset.

For an asset to be classified and measured at amortized cost or at fair value through other comprehensive income, its contractual terms should give rise to cash flows that are solely payments of principal and interest on the principal outstanding (SPPI).

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Interest consists of the consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time, and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement and the interest on the base outstanding amount which comply with the primary funding arrangement. Moreover, contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

Assessment of Business Models

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. In this regard, the Bank determines the business models at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. Furthermore, the Bank's business model does not depend on management's intentions for an individual instrument; therefore, the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

The Bank has more than one business model for managing its financial instruments, which reflect how the Bank manages its financial assets in order to generate cash flows. In addition, the Bank's business models determine whether cash flows will result from collecting contractual cash flows, selling financial assets, or both.

The Bank considers all relevant information available when making the business model assessment. However, this assessment is not performed based on scenarios that the Bank does not reasonably expect to occur, such as so-called 'worst case' or 'stress case' scenarios. The Bank takes into account all relevant evidence available such as:

- The stated policies and objectives of the portfolio and application of those policies whether the management strategy focuses on obtaining contractual revenues, maintaining specific profit rate, and matching the profit of financial assets with the period of financial liabilities that finance those assets;

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;

- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and

- How the business managers are compensated (e.g. whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).

At initial recognition of a financial asset, the Bank determines whether newly recognized financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Bank reassess its business models each reporting period to determine whether the business models have changed since the preceding period.

When a debt instrument measured at fair value through other comprehensive income is derecognized, the cumulative gain/loss previously recognized in other comprehensive income is reclassified from equity to the statement of Profit or Loss. In contrast, for an equity investment designated as measured at fair value through other comprehensive income, the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss but transferred within equity.

Debt instruments that are subsequently measured at amortized cost or at fair value through other comprehensive income are subject to impairment.

Financial Assets at Fair Value through the Statement of Profit or Loss
Financial assets at fair value through the statement of Profit or Loss are:

- Assets with contractual cash flows that are not SPPI; or/and
- Assets that are held in a business model other than held to collect contractual cash flows or held to collect and sell; or
- Assets designated at fair value through the statement of Profit or Loss using the fair value option.

These assets are measured at fair value, with any gains/losses arising on re-measurement recognized in the consolidated statement of profit or loss.

Reclassifications
If the business model under which the Bank holds financial assets changes, the financial assets affected are reclassified. The classification and measurement requirements related to the new category apply prospectively from the first day of the first reporting period following the change in business model, which results in reclassifying the Bank's financial assets. During the current financial year and previous accounting period, there has been no change in the business model under which the Bank holds financial assets; and therefore, no reclassifications have been made. The changes in the contractual cash flows are considered under the accounting policy on the modification and de-recognition of financial assets described below.

Foreign Exchange Gains and Losses
The carrying amount of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically:

- For financial assets measured at amortized cost that are not part of a designated hedging relationship, exchange differences are recognized in the statement of Profit or Loss; and

- For debt instruments measured at fair value through other comprehensive income that are not part of a designated hedging relationship, exchange differences on the amortized cost of the debt instrument are recognized in the statement of Profit or Loss. Other exchange differences are recognized in other comprehensive income in the investment's revaluation reserve;

- For financial assets measured at fair value through the statement of Profit or Loss that are not part of a designated hedge accounting relationship, exchange differences are recognized in the statement of Profit or Loss and,

- For equity instruments measured at fair value through other comprehensive income, exchange differences are recognized in other comprehensive income in the investment's revaluation reserve.

Fair Value Option
A financial instrument with a fair value that can be reliably measured at fair value through the statement of Profit or Loss (fair value option) can be classified at initial recognition even if the financial instruments are not acquired or incurred principally for the purpose of selling or repurchasing. The fair value option may be used for financial assets if it significantly eliminates or significantly reduces the measurement or recognition inconsistency that would otherwise have resulted in the measurement of the asset or liability or recognized the related gain or loss on a different basis ("accounting mismatch"). The fair value option for financial liabilities can be chosen in the following cases:

- If the selection leads to an accounting mismatch.

- If the financial liabilities are part of a portfolio managed on a fair value basis, according to a documented risk management or investment strategy; or

- If there is a derivative included in the primary financial or non-financial contract, and the derivative is not closely related to the primary contract.

These instruments cannot be reclassified from the fair value category through the statement of Profit or Loss while retained or issued. Financial assets at fair value through the Profit or Loss statement are recognized at fair value with any unrealized gain or loss arising from changes in fair value recognized in investment income.

Impairment

The Bank recognizes loss allowances for expected credit losses on the following financial instruments that are not measured at fair value through the statement of Profit or Loss:

- Balances and deposits at banks and financial institutions.
- Direct credit facilities (loans and advances to customers).
- Financial assets at amortized cost (debt instruments securities).
- Financial assets at fair value through other comprehensive income.
- Off-statement of financial position exposures subject to credit risk (financial guarantee contracts issued).

No impairment loss is recognized on equity instruments.

With the exception of purchased or originated credit-impaired (POCI) financial assets (which are considered separately below), ECLs are required to be measured through a loss allowance at an amount equal to:

- Expected credit loss for (12) months, lifetime ECL that results from those default events on the financial instrument that are possible to happen within 12 months after the reporting date (referred to as Stage 1); or
- Expected credit loss for (12) months, lifetime ECL that results from all possible default events over the life of the financial instrument (referred to as Stage 2 and Stage 3).

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL

ECLs are a probability-weighted estimate of the present value of credit losses. These are measured as the present value of the difference between the cash flows due to the Group under the contract and the cash flows that the Group expects to receive arising from the weighting of multiple future economic scenarios, discounted at the asset's EIR.

For unutilized limits, the ECL is the difference between the present value of the difference between the contractual cash flows that are due to the Group if the holder of the commitment draws down the loan and the cash flows that the Group expects to receive if the loan is utilized; and

For financial guaranteed contracts, the ECL is the difference between the expected payments to reimburse the holder of the guaranteed debt instrument less any amounts that the Group expects to receive from the holder, the client, or any other party.

The Bank measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measured on an individual basis or a collective basis.

When calculating ECL against exposures, the calculation results as per IFRS (9) are compared with those according to the Central Bank of Jordan's Instructions No. (47/2009) dated December 10, 2009 for each stage separately. Moreover, the most severe results are taken, and the debt instruments issued by the Jordanian government or guaranteed by it, in addition to any other credit exposures with the Jordanian government or guaranteed by it, are excluded from the calculation.

Credit-impaired Financial Assets

A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit-impaired financial assets are referred to as Stage (3) assets. Evidence of credit-impairment includes observable data about the following events:

- Significant financial difficulty of the borrower or issuer;

- A breach of contract such as a default or past-due event;

- The lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider; or

- The disappearance of an active market for a security because of financial difficulties; or

- The purchase of a financial asset at a deep discount that reflects the incurred credit losses.

It may not be possible to identify a single discrete event. Instead, the combined effect of several events may have caused financial assets to become credit-impaired. In this regard, the Bank assesses whether debt instruments that are financial assets measured at amortized cost or fair value through other comprehensive income are credit-impaired at each reporting date. To assess if sovereign and corporate debt instruments are credit impaired, the Bank considers factors such as bond yields, credit ratings, and the ability of the borrower to raise funding.

A loan is considered credit-impaired when a concession is granted to the borrower due to a deterioration in the borrower's financial condition, unless there is evidence that as a result of granting the concession, the risk of not receiving the contractual cash flows has reduced significantly, and there are no other indicators of impairment. For financial assets where concessions are contemplated but not granted, the asset is deemed credit-impaired when there is observable evidence of credit-impairment including meeting the definition of default. The definition of *default* includes unlikeliness-to-pay indicators and a back- stop if amounts are overdue for 90 days or more. However, in cases where the assets impairment is not recognized after 90 days from their due date, the assets are supported by reasonable information.

Purchased or Originated Credit-impaired (POCI) Financial Assets

POCI financial assets are treated differently because the asset has a credit-impaired at initial recognition. For these assets, the Bank recognizes all changes in the lifetime expected credit loss (ECL) since initial recognition as a loss allowance with any changes recognized in the statement of profit or loss. A favorable change for such assets creates an impairment gain.

Definition of Default

Critical to the determination of ECL is the definition of default. The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12-month or lifetime ECL, as default is a component of the probability of default (PD) which affects both the measurement of ECLs and the identification of a significant increase in credit risk below.

The Bank considers the following as constituting an event of default:

- The borrower is past-due more than 90 days on any material credit obligation to the Bank; or

- The borrower is unlikely to pay its credit obligations to the Bank in full.

The definition of default is appropriately tailored to reflect different characteristics of different types of assets. Overdrafts are considered as being past-due once the customer has breached an advised limit or has been advised of a limit smaller than the current amount outstanding.

When assessing if the borrower is unlikely to pay its credit obligation, the Bank takes into account both qualitative and quantitative indicators. The information assessed depends on the type of the asset. For example, in corporate lending, a qualitative indicator used is the breach of covenants, which is not relevant for retail lending. Quantitative indicators, such as overdue status and non-payment on another obligation of the same counterparty, are key inputs in this analysis. The Bank uses a variety of sources of information to assess default that is either developed internally or obtained from external sources.

Significant Increase in Credit Risk

The Bank monitors all financial assets, issued loan commitments, and financial guarantee contracts that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase in credit risk, the Bank measures the loss allowance based on lifetime rather than (12) month ECL.

The Bank does not consider that the financial assets with 'low' credit risk at the reporting date does not have had a significant increase in credit risk. As a result, the Bank monitors all financial assets, issued loan commitments, and financial guarantee contracts that are subject to impairment for significant increase in credit risk.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Bank compares the risk of a default occurring on the financial instrument at the reporting date, based on the remaining maturity of the instrument, with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognized. In making this assessment, the Bank considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Bank's historical experience and expert credit assessment including forward-looking information.

Multiple economic scenarios represent the basis of determining the probability of default at initial recognition and at subsequent reporting dates. Different economic scenarios will lead to a different probability of default. It is the weighting of these different scenarios that forms the basis of a weighted average probability of default that is used to determine whether credit risk has significantly increased.

For corporate lending, forward-looking information includes the future prospects of the industries in which the Bank's counterparties operate, and in which it is obtained from the economic experts reports, financial analysts, governmental bodies, relevant think-tanks and other similar organizations. In addition, various internal and external sources of actual and forecast economic information are considered. For retail lending, forward-looking lending information includes the same economic forecasts as corporate lending with additional forecasts of local economic indicators, particularly for regions with a concentration to certain industries, as well as internally generated information of customer payment behavior. The Bank allocates its counterparties to a relevant internal credit risk grade depending on their credit quality. The quantitative information is a primary indicator of a significant increase in credit risk and is based on the change in lifetime PD by comparing:

- The remaining lifetime PD at the reporting date; and
- The remaining lifetime PD for this point in time that was estimated based on facts and circumstances at the time of initial recognition of the exposure.

The PDs used are forward looking, and the Bank uses the same methodologies and data used to measure the loss allowance for ECL.

The qualitative factors that indicate a significant increase in credit risk are reflected in PD models on a timely basis. However, the Bank still considers some qualitative factors separately to assess if credit risk has increased significantly. For corporate lending, there is a particular focus on assets included in the 'watch list'. An exposure is watch-listed once there is concern that the creditworthiness of the specific counterparty has deteriorated. For retail lending, the Bank considers the expectation of default in payment periods and forbearance of its non-occurrence, credit scores, and events such as unemployment, bankruptcy, divorce, or death.

Given that a significant increase in credit risk since initial recognition is a relative measure, a given change, in absolute terms, in the PD will be more significant for a financial instrument with a lower initial PD than for a financial instrument with a higher PD.

As a back-stop when an asset's maturity exceeds (30) days, the Bank considers that a significant increase in credit risk has occurred, and the asset is in Stage (2) of the impairment model, i.e. the loss allowance is measured as a lifetime expected credit loss (ECL) balance.

Modification and Derecognition of Financial Assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and the maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the covenant is or is not met (e.g. a change to the increase in the interest rate that arises when covenants are breached).

The Bank renegotiates loans to customers in financial difficulty to maximize collection and minimize the risk of default. A loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default, or default has already happened, and the borrower is expected to be able to meet the revised terms. In most cases, the revised terms include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the amount of cash flows due (principal and interest forgiveness) and amendments to covenants. The Bank has an established forbearance policy applicable to corporate and retail lending.

When a financial asset is modified, the Bank assesses whether this modification results in derecognition. In accordance with the Bank's policy, a modification results in derecognition when it gives rise to substantially different terms. To determine if the modified terms are substantially different from the original contractual terms, the Bank considers the following:

- Qualitative factors, such as contractual cash flows after modification are no longer SPPI, change in currency or change of counterparty, the extent of change in interest rates, maturity, and covenants. If these do not clearly indicate a substantial modification, then;

- A quantitative assessment is performed to compare the present value of the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, both amounts discounted at the original effective interest.

In case the financial asset is derecognized, the loss allowance for ECL is re-measured at the date of derecognition to determine the net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new terms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance measured based on 12-month ECL except in the rare occasions where the new loan is considered to be originated- credit impaired. This applies only in the case where the fair value of the new loan is recognized at a significant discount to its revised nominal amount because there remains a high risk of default which has not been reduced by the modification. The Bank monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified, and the modification does not result in derecognition, the Bank determines if the financial asset's credit risk has increased significantly since initial recognition by comparing:

- The remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.
- The remaining lifetime PD at the reporting date based on the modified terms.

For financial assets modified as part of the Bank's forbearance policy, where modification did not result in derecognition, the estimate of PD reflects the Bank's ability to collect the modified cash flows taking into account the Bank's previous experience of similar forbearance action, as well as various behavioral indicators, including the borrower's payment performance against the modified contractual terms. If the credit risk remains significantly higher than what was expected at initial recognition, the loss allowance will continue to be measured at an amount equal to lifetime ECL. The loss allowance on forborne loans will generally only be measured based on 12-month ECL when there is evidence of the borrower's improved repayment behavior following modification leading to a reversal of the previous significant increase in credit risk.

Where a modification does not lead to derecognition, the Bank calculates the modification gain/loss comparing the gross carrying amount before and after the modification (excluding the ECL allowance). Then the Bank measures ECL for the modified asset, where the expected cash flows arising from the modified financial asset are included in calculating the expected cash shortfalls from the original asset.

The Bank derecognizes a financial asset only when the contractual rights to the asset's cash flows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Bank neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Bank recognizes its retained interest in the asset and an associated liability for the amounts it may have to pay. If the Bank retains substantially all the risks and rewards of ownership of a transferred financial asset, the Bank continues to recognize the financial asset and any collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that has been recognized in OCI and accumulated in equity is recognized in profit or loss, with the exception of equity investment designated as measured at fair value through other comprehensive income, where the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss.

<u>Write-off</u>
Financial assets are written off when the Bank has no reasonable expectations of recovering them, such as failure by the customer to participate in a payment plan with the Bank. Moreover, the Bank classifies funds or amounts due to be written off after all possible means of payment have been exhausted. However, if the financing is/receivables are written off, the Bank continues its enforcement activity in an attempt to recover the due receivables, which are recognized in the consolidated statement of Profit or Loss upon recovery.

<u>Presentation of Allowance for ECL in the Consolidated Statement of Financial Position</u>
Loss allowances for ECL are presented in the statement of financial position as follows:

- For financial assets measured at amortized cost: as a deduction from the gross carrying amount of the assets.

- For debt instruments measured at fair value through other comprehensive income: no loss allowance is recognized in the statement of financial position, as the carrying amount is at fair value. However, the loss allowance is included as part of the revaluation amount in the investment's revaluation reserve.

- For loan commitments and financial guarantee contracts: as a provision; and

- Where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision.

Financial Liabilities and Equity
Debt and equity instruments issued are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

A financial liability is a contractual obligation to deliver cash or another financial asset, or to exchange financial assets or financial liabilities with another entity under conditions potentially unfavorable to the Bank, or a contract that will or may be settled in the Bank's own equity instruments and is a non-derivative contract for which the Bank is or may be obliged to deliver a variable number of its own equity instruments, or a derivative contract over own equity that will or may be settled other than by the exchange of a fixed amount of cash (or another financial asset) for a fixed number of the Bank's own equity instruments.

Equity Instruments
Paid-up Capital
An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Bank are recognized at the proceeds received, net of direct issue costs.

Treasury Shares
Repurchase of the Bank's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in the statement of Profit or Loss on the purchase, sale, issue or cancellation of the Bank's own equity instruments.

Compound Instruments
The component parts of compound instruments (e.g. convertible notes) issued by the Bank are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. Moreover, non-closed related embedded derivatives, if any, are separated first with the remainder of the financial liability being recorded on an amortized cost basis, using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

Financial Liabilities
Financial liabilities are classified as either financial liabilities 'at fair value through the statement of Profit or Loss or 'other financial liabilities.

Financial liabilities at Fair Value through the Statement of Profit or Loss
Financial liabilities are classified as at fair value through the statement of Profit or Loss when the financial liability is (1) held for trading, or (2) it is designated as at fair value through the statement of Profit or Loss. A financial liability is classified as held for trading if:

- It has been incurred principally for the purpose of repurchasing it in the near term; or

- On initial recognition, it is part of a portfolio of identified financial instruments that the Bank manages together and has a recent actual pattern of short-term profit-taking; or

- It is a derivative that is not designated and effective as a hedging instrument.

A financial liability, other than a financial liability held for trading, or contingent consideration that may be paid by an acquirer as part of a business combination, may be designated as at fair value through the statement of Profit or Loss upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or

- The financial liability forms part of a group of financial assets or financial liabilities or both, which is managed, and its performance is evaluated on a fair value basis, in accordance with the Bank's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or

- It forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire hybrid (combined) contract to be designated as at fair value through the statement of Profit or Loss.

Financial liabilities at fair value through the statement of Profit or Loss are stated at fair value, with any gains/losses arising on re-measurement recognized in the statement of Profit or Loss to the extent that they are not part of a designated hedging relationship. The net gain/loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the 'net income from other financial instruments at fair value through the statement of Profit or Loss line item in the statement of Profit or Loss.

However, for non-derivative financial liabilities designated as at fair value through profit or loss, the amount of change in the fair value of the financial liability attributable to changes in the credit risk of that liability is recognized in OCI, unless the recognition of the effects of changes in the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognized in profit or loss. Moreover, changes in fair value attributable to a financial liability's credit risk recognized in OCI are not subsequently reclassified to profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability.

For issued loan commitments and financial guarantee contracts designated as at fair value through profit or loss, all gains and losses are recognized in the consolidated statement of profit or loss.

In making the determination of whether recognizing changes in the liability's credit risk in other comprehensive income will create or enlarge an accounting mismatch in profit or loss, the Bank assesses whether it expects that the effects of changes in the liability's credit risk will be offset in profit or loss by a change in the fair value of another financial instrument measured at fair value through the consolidated statement of Profit or Loss.

Other Financial Liabilities
Other financial liabilities, including deposits and borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The EIR is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition. For details on EIR, see the "net interest income section" above.

Derecognition of Financial Liabilities
The Bank derecognizes financial liabilities when, and only when, the Bank's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in the consolidated statement of Profit or Loss.

When the Bank exchanges with the existing lender one debt instrument into another one with substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, the Bank accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective rate, is at least (10) per cent different from the discounted present value of the remaining cash flows of the original financial liability.

Derivative Financial Instruments
The Bank enters into a variety of derivative financial instruments, some of which are held for trading while others are held to manage its exposure to interest rate risk, credit risk, and foreign exchange rate risk. Held derivatives include foreign exchange forward contracts, interest rate swaps, cross currency interest rate swaps, and credit default swaps.

Derivatives are initially recognized at fair value at the date a derivative contract is entered into, and are subsequently re-measured to their fair value at each balance sheet date. The resulting gain/loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. The Bank designates certain derivatives as either hedges of the fair value of recognized assets, liabilities or firm commitments (fair value hedges), hedges of highly probable forecast transactions, hedges of foreign currency risk of firm commitments (cash flow hedges), or hedges of net investments in foreign operations (net investment hedges).

A derivative with a positive fair value is recognized as a financial asset whereas a derivative with a negative fair value is recognized as a financial liability. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than (12) months, and it is not expected to be realized or settled within (12) months. Other derivatives are presented as current assets or current liabilities.

Embedded Derivatives
Derivatives embedded in financial liabilities or other non-financial asset host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts, and the host contracts are not measured at fair value through profit or loss.

An embedded derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the hybrid instrument to which the embedded derivative relates is more than 12 months and is not expected to be realized or settled within (12) months. Other embedded derivatives are presented as current assets or current liabilities.

Financial Guarantee Contracts
A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by a group entity are initially measured at their fair values and, if not designated as at fair value through profit or loss and not arising from a transfer of a financial asset, are subsequently measured at the higher of:

- The amount of the loss allowance determined in accordance with IFRS (9); and
- The amount initially recognized less, where appropriate, the cumulative amount of income recognized in accordance with the Bank’s revenue recognition policies.

Financial guarantee contracts not designated at fair value through profit or loss are presented as provisions in the consolidated statement of financial position, and the re-measurement is presented in other revenue.

The Bank has not designated any financial guarantee contracts as at fair value through profit or loss.

Commitments to Provide a Loan at a Below-Market Interest Rate
Commitments to provide a loan at a below-market interest rate are initially measured at their fair values and, if not designated as at fair value through profit or loss, are subsequently measured at the higher of:

- The amount of the loss allowance determined in accordance with IFRS 9; and
- The amount initially recognized less, where appropriate, the cumulative amount of income recognized in accordance with the Bank's revenue recognition policies.

Commitments to provide a loan below market rate not designated at fair value through profit or loss are presented as provisions in the consolidated statement of financial position, and the re-measurement is presented in other revenue.

The Bank has not designated any commitments to provide a loan below market rate designated at fair value through profit or loss.

Hedge Accounting
The Bank designates certain derivatives as hedging instruments in respect of foreign currency risk and interest rate risk in fair value hedges, cash flow hedges, or hedges of net investments in foreign operations, as appropriate. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges. The Bank does not apply fair value hedge accounting of portfolio hedges of interest rate risk. In addition, the Bank does not use the exemption to continue using IAS (39) hedge accounting rules, i.e. the Bank applies IFRS 9 hedge accounting rules in full.

At the inception of the hedge relationship, the Bank documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Bank documents whether the hedging instrument is effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk, which is when the hedging relationships meet all of the following hedge effectiveness requirements:

- There is an economic relationship between the hedged item and the hedging instrument;
- The effect of credit risk does not dominate the value changes that result from that economic relationship; and
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Bank actually hedges, and the quantity of the hedging instrument that the Bank actually uses to hedge that quantity of the hedged item.

The Bank rebalances a hedging relationship in order to comply with the hedge ratio requirements, when necessary. In such cases, discontinuation may apply to only part of the hedging relationship. For example, the hedge ratio might be adjusted in such a way that some of the volume of the hedged item is no longer part of a hedging relationship. Hence, hedge accounting is discontinued only for the volume of the hedged item that is no longer part of the hedging relationship.

If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio, but the risk management objective for that designated hedging relationship remains the same, the Bank adjusts the hedge ratio of the hedging relationship (i.e. rebalances the hedge) so that it meets the qualifying criteria again.

In some hedge relationships, the Bank designates only the intrinsic value of options. In this case, the fair value change of the time value component of the option contract is deferred in OCI, over the term of the hedge, to the extent that it relates to the hedged item and is reclassified from equity to profit or loss when the hedged item does not result in the recognition of a non-financial item. The Bank's risk management policy does not include hedges of items that result in the recognition of non-financial items, because the Bank's risk exposures relate to financial items only.

The hedged items designated by the Bank are time-period related hedged items. This means that the amount of the original time value of the option that relates to the hedged item is amortized from equity to profit or loss on a rational basis (e.g. straight- line) over the term of the hedging relationship.

In some hedge relationships, the Bank excludes from the designation the forward element of forward contracts, or the currency basis spread of cross currency hedging instruments. In this case, a similar treatment is applied to the one applied for the time value of options. The treatment for the forward element of a forward contract and the currency basis element is optional, and the option is applied on a hedge- by- hedge basis, unlike the treatment for the time value of the options which is mandatory. For hedge relationships with forwards, or foreign currency derivatives such as cross currency interest rate swaps, where the forward element or the currency basis spread is excluded from the designation, the Bank generally recognizes the excluded element in the other comprehensive income.

The fair values of the derivative instruments used for hedging purposes and movements in the hedging reserve are determined in equity.

<u>Fair Value Hedges</u>
The fair value change on qualifying hedging instruments is recognized in profit or loss except when the hedging instrument hedges an equity instrument designated at fair value through other comprehensive income in which case it is recognized in other comprehensive income. The Bank has not designated fair value hedge relationships where the hedging instrument hedges an equity instrument designated at fair value through other comprehensive income.

The carrying amount of a hedged item not already measured at fair value is adjusted for the fair value change attributable to the hedged risk with a corresponding entry in profit or loss. For debt instruments measured at fair value through other comprehensive income, the carrying amount is not adjusted as it is already at fair value, but the part of the fair value gain or loss on the hedged item associated with the hedged risk is recognized in profit or loss instead of OCI. When the hedged item is an equity instrument designated at fair value through other comprehensive income, the hedging gain/loss remains in other comprehensive income to match that of the hedging instrument.

Where hedging gains/losses are recognized in profit or loss, they are recognized in the same line as the hedged item.

The Bank discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. The fair value adjustment to the carrying amount of hedged items for which the EIR method is used (i.e. debt instruments measured at amortized cost or at fair value through other comprehensive income) arising from the hedged risk is amortized to profit or loss commencing no later than the date when hedge accounting is discontinued.

<u>Cash Flow Hedges</u>
The effective portion of changes in the fair value of derivatives and other qualifying hedging instruments that are designated and qualify as cash flow hedges is recognized in the cash flow hedging reserve, a separate component of OCI, limited to the cumulative change in fair value of the hedged item from inception of the hedge less any amounts recycled to profit or loss.

Amounts previously recognized in OCI and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognized hedged item. If the Bank no longer expects the transaction to occur, that amount is immediately reclassified to profit or loss.

The Bank discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised, or where the occurrence of the designated hedged forecast transaction is no longer considered to be highly probable. The discontinuation is accounted for prospectively. Any gain/loss recognized in OCI and accumulated in equity at that time remains in equity and is recognized when the forecast transaction is ultimately recognized in profit or loss. When a forecast transaction is no longer expected to occur, the gain/loss accumulated in equity is reclassified and recognized immediately in profit or loss.

Hedges of Net Investments in Foreign Operations
Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain/loss on the hedging instrument relating to the effective portion of the hedge is recognized in OCI and accumulated in the foreign currency translation reserve.

Gains and losses on the hedging instrument relating to the effective portion of the hedge accumulated in the foreign currency translation reserve are reclassified to profit or loss in the same way as exchange differences relating to the foreign operation as described above.

Property and Equipment
- Property and equipment are measured at cost less accumulated depreciation and any impairment. Property and equipment (except land) are depreciated when ready for use using the straight-line method over their expected useful life.

- The depreciation rates used are as follows:

| | % |
|---|---|
| Buildings | 2 – 15 |
| Equipment, furniture and fixtures | 9 – 20 |
| Vehicles | 15 |
| Computer | 9 – 25 |
| Lease Hold Improvement | 9 – 10 |

- When the recoverable amount of any property and equipment is less than its net book value, its carrying amount is written down to its recoverable amount, and the amount of impairment is recognized in the consolidated statement of Profit or Loss.

- The useful life of property and equipment is reviewed at each year-end, and changes in the expected useful life are treated as changes in accounting estimates.

- An item of property and equipment is derecognized upon disposal, or when no future economic benefits are expected from its use or disposal.

- Projects under construction include the value of the work in progress and the expenses of the related departments, and they are charged with their related direct costs and the costs deferred until completion of the project.

- Payments for the purchase of property and equipment.

Fair value
Fair value is defined as the price at which an asset is to be sold or paid to conver any of the liabilities in a structured transaction between the market participants on the measurement date, irrespective of whether the price can be realized directly or whether it is estimated using another valuation technique. When estimating the fair value of an asset or liability, the Bank takes into consideration, when determining the price of any asset or liability, whether market participants are required to consider these factors at the measurement date. The fair value for measurement and / or disclosure purposes in these financial statements is determined on the same basis, except for measurement procedures that are similar to fair value procedures and are not fair value such as fair value as used in IAS (36).

In addition, fair value measurements are classified for the purposes of financial reporting to levels (1), (2) or (3) based on the extent to which the inputs are clear concerning the fair value measurements and the importance of inputs to the full fair value measurements. These are as follows:

Level (1) inputs: Inputs derived from quoted (unadjusted) prices of identical assets or liabilities in active markets that an enterprise can obtain on the measurement date;

Level (2) inputs: Inputs derived from data other than quoted prices used at level (1) and observable for assets or liabilities, either directly or indirectly; and

Level (3) inputs: Inputs to assets or liabilities that are not based on observable market prices.

Provisions
Provisions are recognized when the Bank has an obligation, at the date of the consolidated statement of financial position, arising from a past event, and the costs to settle the obligation are both probable and can be reliably measured.

Income Tax
- Tax expense comprises of current tax and deferred taxes.

- Current tax is based on taxable profits, which may differ from accounting profits published in the financial statements. Accounting profits may include non-taxable profits or tax non-deductible expenses which may be exempted in the current or subsequent financial years, or accumulated losses that are tax acceptable or items not subject to deduction for tax purposes.

- Tax is calculated based on tax rates and laws that are applicable in the Hashemite Kingdom of Jordan.

- Deferred tax is the tax expected to be paid or recovered due to temporary differences between the assets or liabilities in the consolidated financial statements and the value on which the tax profit is calculated. Deferred taxes are calculated using the commitment method of the consolidated statement of financial position. Deferred taxes are calculated based on the tax rates expected to be applied when the tax liability is settled or the deferred tax asset is realized.

- The carrying values of deferred tax assets are reviewed at the date of the consolidated financial statement and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Paid-up Capital
Cost of issuing or purchasing Bank's shares
Any costs arising from the issue or purchase of the Bank's shares are charged to retained earnings net of the tax effect of such costs, if any. If the issuance or purchase process is not completed, these costs are recognized as an expense in the consolidated statement of Profit or Loss.

Managed Accounts for Customers
The accounts managed by the Bank on behalf of the customers are not considered a Bank's assets. Fees and commissions of managing such accounts are presented in the consolidated statement of Profit or Loss. A provision is booked for impairment of portfolios guaranteed capital that are managed to the beneficiary of the customers on their capital.

Offsetting
Financial assets and financial liabilities are offset, and the net amount reported in the consolidated statement of financial position, when there is a legally enforceable right to offset the recognized amounts, and the Bank intends to either settle them on a net basis, or to realize the asset and settle the liability simultaneously.

Revenue Recognition and Recognition of Expenses
- Income and expense recognition are recognized on an accrual basis except of the interest and commission on non-performing credit facilities that are not recognized as income and are credited to suspended interest and commissions.

- Commissions are recognized as a revenue when rendering related services, and the companies' shares earnings are recognized when realized (Approved by the General Assembly of Shareholders).

Date of Recognition of Financial Assets
The purchase and sale of financial assets are recognized on the trade date (date of the Bank's commitment to sell or buy financial assets).

Financial Derivatives and Hedge Accounting

Hedge Financial Derivatives

For hedge accounting purposes, financial derivatives are stated at fair value, and hedges are classified as follows:

- **Fair value hedges:** These represent hedging the risk of the change in the fair value of the Bank's assets and liabilities.

  In case the effective fair value hedges are effective, profits and losses arising from the valuation of a hedging instrument at fair value, and from the change in the fair value of the hedged asset or liability, are recognized in the consolidated statement of Profit or Loss.

  In the case of effective portfolio hedge conditions, profits or losses arising from revaluation of the hedging instrument are recognized at fair value, and the fair value of the asset or liability portfolio is recognized in the consolidated statement of Profit or Loss in the same period.

- **Cash flows hedges:** These represent hedging the risk of the changes in the cash flows of the Bank's current and expected assets and liabilities.

  In the case of effective cash flow hedge conditions, the profits or losses on a hedging instrument is recognized in the consolidated statement of comprehensive income and in equity, and is transferred to the consolidated statement of Profit or Loss in the period in which the hedged transaction affects the consolidated statement of Profit or Loss.

- **Hedging for net investment in foreign units:** In case hedge conditions apply to net investment in foreign units, the fair value of the hedging instrument is measured against the hedged net assets. If the relationship is effective, the effective portion of the profits or losses on the hedging instrument is recognized in the consolidated statement of comprehensive income and in shareholders' equity, and the ineffective portion is recognized in the consolidated statement of Profit or Loss. Moreover, the effective portion is recognized in the consolidated statement of Profit or Loss when the investment in the foreign investee is sold.

- For hedges that do not qualify for effective hedging, gains or losses arising from changes in the fair value of the hedging instrument are recognized in the consolidated statement of Profit or Loss in the same period.

Derivatives for Trading

The fair value of derivative financial instruments held for trading (such as future foreign exchange contracts, future interest contracts, swaps contracts, foreign exchange rate option rights) is recognized in the consolidated statement of financial position. Moreover, fair value is determined at the prevailing market prices. If these prices are not available, the assessment method should be mentioned, and the amount of changes in fair value should be recognized in the consolidated statement of Profit or Loss.

Repurchase and Resale Agreements

- Assets sold with a simultaneous commitment to repurchase at a specified future date (repos) will continue to be recognized in the Bank's consolidated financial statements. This is due to the Bank's continuing control of these assets and the fact that exposure to the risks and rewards of these assets remains with the Bank. These assets continue to be evaluated in accordance with the applied accounting policies (where the buyer has the right to use these assets (sell or re-lien), they are reclassified as lined financial assets). The proceeds of the sale are recorded under loans and borrowings. The difference between the sale and the repurchase price is recognized as an interest expense over the agreement term, using the effective interest rate method.

- Assets purchased with a corresponding commitment to resell at a specified future date (reverse repos) are not recognized in the consolidated financial statements since the Bank is not able to control these assets or the associated risks and benefits. The related payments are recognized as part of deposits at banks and financial institutions or direct credit facilities as applicable, and the difference between the purchase and resale price is recognized as interest income over the agreement term, using the effective interest rate method.

Assets Seized by the Bank Against Debts
Assets foreclosed to the Bank are shown in the consolidated statement of financial position, among other assets at their current value when it foreclosed to the Bank or at their fair value, whichever is lower. Furthermore, they are revaluated on the date of the consolidated financial statements separately, and any decrease in its value is recorded in the consolidated statement of profit or loss and consolidated comprehensive income while no increase in its value is recorded as revenue, in which, any subsequent increase is taken to the consolidated statement of profit or loss and other comprehensive income to the extent of not exceeding the previously recorded impairment value. In accordance with central Bank of Jordan’s generalization (10/3/16234) dated October 10, 2022 the calculation of the gradual provision for the foreclosed assets against debts has been suspended. Provided that the allocated provisions for the expropriated foreclosed assets in violation of the terms included in the banking low maintained, and that only the allocated provision is released against any of the violating real estate that are disposed of.

Intangible Assets
- Intangible assets acquired through business combinations are recorded at their fair value on that date. Other intangible assets are measured on initial recognition at cost.

- Intangible assets are classified based on the assessment of their useful life to definite and indefinite lives. Intangible assets with definite lives are amortized over their useful economic life, while intangible assets with indefinite useful lives are assessed for impairment at each reporting date, and impairment loss is charged to the consolidated statement of Profit or Loss.

- Internally generated intangible assets are not capitalized, but rather expensed in the consolidated Profit or Loss statement.

- Indications of impairment of intangible assets are reviewed, and their useful economic lives are reassessed at each reporting date. Adjustments are reflected in the current and subsequent periods.

- Other intangible assets consist of computer software, and key-money is amortized using the straight -line method at an annual rate of 20%.

Foreign Currencies
For the purpose of the consolidated financial statements, the results and financial position of each entity of the Group are presented in the functional currency unit of the Bank and the presentation currency of the consolidated financial statements.

The stand-alone financial statements of the Bank's subsidiaries are prepared. Moreover, the stand-alone financial statements of each entity of the Group are presented in the functional currency with which it operates. Transactions in currencies other than the functional currency of the Bank are recorded at the rates of exchange prevailing at the dates of those transactions. At the balance sheet date, financial assets and liabilities denominated in foreign currencies are translated at the rates of exchange prevailing at that date. Non-monetary items carried at fair value and denominated in foreign currencies are translated at the exchange rates at the date the fair value is determined. Non-monetary items measured at historical cost in a foreign currency are not reclassified.

Exchange differences are recognized in the consolidated statement of Profit or Loss in the period in which they arise except for:

- Foreign exchange differences on transactions made in order to hedge foreign exchange risk.

- Foreign exchange differences on monetary items required to / from a foreign operation that are not planned to be settled, are unlikely to be settled in the near future (and therefore, these differences form part of the net investment in the foreign operation), and are initially recognized in the other comprehensive income statement and reclassified from equity to the Profit or Loss statement when selling or partially disposing of net investment.

In order to present the consolidated financial statements, the assets and liabilities of the Bank's foreign operations are translated at the rates of exchange prevailing at the statement of financial position date. Income is also converted to average exchange rates for the period, unless exchange rates change significantly during that period, in which case the exchange rates are used on the date of the transactions. The resulting exchange differences, if any, are recognized in the consolidated statement of other comprehensive income and stated in a separate line item of equity.

When foreign operations are disposed of (i.e. disposal of the Bank’s entire share from foreign operations, or results from the loss of control of a subsidiary in foreign operations, or partial exclusion by its share in a joint arrangement, or an associate company of a foreign nature in which the share held is a financial asset), all foreign exchange differences accumulated in a separate item under equity in respect of that transaction attributable to the Bank owners are reclassified to the consolidated statement of Profit or Loss.

In respect of the partial disposal of a subsidiary involving foreign operations that do not result in the Bank losing control of the subsidiary, its share of the accumulated exchange differences is credited to net comprehensive income at a rate that is derecognized and not recognized in the consolidated statement of Profit or Loss. For all other partial liquidation (such as partial liquidation of associates or joint ventures that do not result in the Bank losing significant influence or joint control), the share of accumulated exchange differences is reclassified to the consolidated statement of Profit or Loss.

Leases
Leases are classified as finance leases when the terms of the lease provide for substantially all the risks and rewards of ownership of the lessee. All other leases are classified as operating leases.

**Lease Contracts**
The Bank as a Lessee
The Bank assesses whether the contract contains lease when starting the contract. Moreover, the Bank recognizes the right-of-use assets and the corresponding lease obligations in relation to all lease arrangements to which the lessee is a party, except for short-term lease contracts (defined as leases of 12 months or less) and low-value asset leases. For these contracts, the Bank recognizes the lease payments as an operating expense on a straight-line basis over the period of the lease, unless another regular basis is more representative of the time pattern in which the economic benefits from the leased assets are utilized.

The lease obligation is initially measured at the present value of the lease payments that were not paid on the start date of the lease, and is discounted using the price implicit in the lease. If this rate cannot be easily determined, the Bank uses its additional expected rate.

The lease payments included in the rental obligation measurement include:

- Fixed rental payments (essentially including fixed payments), minus accrued receivable rental incentives;

- Variable rental payments that depend on an index or rate, initially measured using the indicator or the rate at the date the contract begins;

- The amount expected to be paid by the lessee under the residual value guarantees;

- The price of the exercise of purchase options, if the lessee is reasonably certain of the exercise of the options; and

- Payment of the contract termination fines, if the lease reflects the exercise of the lease termination option.

Rental obligations are presented as a separate note in the consolidated statement of financial position.

Subsequently, lease obligations are measured by increasing the book value to reflect the interest in the rental obligations (using the effective interest method) and by reducing the book value to reflect the rental payments paid.

The lease obligations (and a similar adjustment to the related right-of-use assets) are re-measured whenever:

- The lease term has changed, or there is an event or important change in the conditions that lead to a change in the exercise of the purchase option assessment, in which case the lease obligations are re-measured by deducting the adjusted lease payment using the adjusted discount rate.

- Lease payments change due to changes in an index, rate, or change in expected payments under the guaranteed residual value, in which cases the lease obligation is re-measured by deducting the modified rental payments using a non-variable discount rate (unless the rental payments change due to a change in the floating interest rate. In this case, the adjusted discount rate is used.

- The lease contract is adjusted, and the lease amendment is not accounted for as a separate lease, in which case the lease obligation is re-measured based on the duration of the adjusted lease contract by deducting the adjusted rental payments, using the adjusted discount rate at the actual price at the date of the amendment.

The right-of-use assets are depreciated over the life of the lease or the useful life of the asset (whichever is shorter). If the lease contract transfers the ownership of the underlying asset or the cost of the right to use, which reflects that the company expects to exercise the purchase option, then the relevant value of the right to use is depreciated over the useful life of the asset. Depreciation begins on the date the commencement of the lease.

The right-of-use assets are presented as a separate note in the consolidated statement of financial position.

The Bank applies International Accounting Standard (36) to determine whether the value of the right to use has decreased its value and calculates any impairment losses as described in the policy of "property and equipment".

Variable rents that are not dependent on an index or rate are not included in the measurement of lease obligations and right-of-use assets. Related payments are recognized as an expense in the period in which the event or condition that leads to these payments occurs and are included in "Other Expenditures" in the statement of profit or loss.

<u>The Bank as a Lessor</u>
The Bank enters into lease contracts as a lessor regarding some investment properties.

Leases in which the Bank is a lessor are classified as operating or finance leases. In the event that the terms of the lease contract transfer all risks and rewards of ownership to the lessee, the contract is classified as a finance lease, and all other leases are classified as operating leases.

When the Bank is an intermediary lessor, it represents the main lease and sub-contract as two separate contracts. The sublease contract is classified as a finance or operating lease by reference to the original right of use arising from the main lease.

Rental income from operating leases is recognized on a straight-line basis over the period of the relevant lease. The primary direct costs incurred in negotiating and arranging an operating lease are added to the book value of the leased asset and are recognized on a straight-line basis over the lease term.

The amounts due from the lessee under finance leases are recognized as receivables with the amount of the company's net investment in the rental contracts. Finance lease income is allocated to accounting periods to reflect a constant periodic rate of return on the Bank's existing net investment with respect to lease contracts.

When the contract includes leasing components and other components other than leasing, the Bank applies IFRS (15) to distribute the amounts received or to be received under the contract for each component.

The Bank as a Lessor

Under finance lease contracts, the amounts due from the lessee are recognized as receivables at the net investment amount in the lease contracts. Moreover, the finance lease income is allocated to accounting periods to reflect a constant periodic return on the net investment as regards rental leases.

Operating lease income is recognized using the straight-line method over the life of the lease. The initial direct costs incurred in the discussion and arrangement of the operating contract are added to the carrying amount of the leased assets and recognized in accordance with the straight-line method over the lease term.

The Bank as a Lessee

Assets acquired through leases are recognized on initial recognition at their fair value at the inception of the lease or at the present value of the minimum lease payments, whichever is lower. Financial leasing liabilities are recorded at the same value. These obligations are presented in the statement of financial position as finance lease liabilities.

The lease payments are distributed between the financing expenses and the decreasing of the financial lease liabilities in order to achieve a fixed rate of interest on the remaining balance of the lease liabilities. Direct financing expenses are recognized in the consolidated statement of profit or loss.

Operating lease payments are recognized as an expense on a straight-line basis over the life of the lease, except in situations there is another regular basis that is more representative of the time pattern in which the economic benefits are utilized from the leased asset. Moreover, contingent lease payments arising from operating leases are recognized as an expense in the period in which they are incurred. In the event that lease incentives are received to enter into an operating lease, these incentives are recognized as an obligation. The overall interest of incentives is recognized as a reduction in the lease expense on a straight-line basis, unless there is a systematic basis that is more representative of the time pattern in which economic benefits from the leased assets are utilized.

Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand and cash balances with central banks and balances with banks and financial institutions that mature within three months, less banks' and financial institutions' deposits that mature within three months and restricted balances.

## 3. Adoption of new and revised Standards

### a. New and amended IFRS Standards that are effective for the current year

The following new and revised IFRSs, which became effective for annual periods beginning on or after January 1, 2023, have been adopted in these consolidated financial statements. The application of these revised IFRSs has not had any material impact on the amounts reported for the current and prior years but may affect the accounting for future transactions or arrangements.

**IFRS 17 Insurance Contracts (including the June 2020 and December 2021 Amendments to IFRS 17)**

IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 Insurance Contracts.

IFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach. The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.

The group does not have any contracts that meet the definition of an insurance contract under IFRS 17.

**Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements— Disclosure of Accounting Policies**

The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

The IASB has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2.

**Amendments to IAS 12 Income Taxes—Deferred Tax related to Assets and Liabilities arising from a Single Transaction**

The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences. Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting profit nor taxable profit.

Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.

**Amendments to IAS 12 Income Taxes— International Tax Reform—Pillar Two Model Rules**

The IASB amends the scope of IAS 12 to clarify that the Standard applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the OECD, including tax law that implements qualified domestic minimum topup taxes described in those rules.

The amendments introduce a temporary exception to the accounting requirements for deferred taxes in IAS 12, so that an entity would neither recognise nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes

**Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors—Definition of Accounting Estimates**

The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". The definition of a change in accounting estimates was deleted.

**b. New and revised IFRS Accounting Standards in issue but not yet effective**

At the date of authorisation of these financial statements, the group has not applied the following new and revised IFRS Accounting Standards that have been issued but are not yet effective The Management anticipates that these new standards, interpretations and amendments will be adopted in the Group's consolidated financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, may have no material impact on the consolidated financial statements of the Group in the period of initial application:

**Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture**

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted.

**Amendments to IAS 1 Presentation of Financial Statements—Classification of Liabilities as Current or Non-current**

The amendments to affect only the presentation of liabilities as current or noncurrent in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.

The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2024, with early application permitted.

**Amendments to IAS 1 Presentation of Financial Statements—Non-current Liabilities with Covenants**

The amendments specify that only covenants that an entity is required to comply with on or before the end of the reporting period affect the entity's right to defer settlement of a liability for at least twelve months after the reporting date (and therefore must be considered in assessing the classification of the liability as current or noncurrent). Such covenants affect whether the right exists at the end of the reporting period, even if compliance with the covenant is assessed only after the reporting date (e.g. a covenant based on the entity's financial position at the reporting date that is assessed for compliance only after the reporting date).

The IASB also specifies that the right to defer settlement of a liability for at least twelve months after the reporting date is not affected if an entity only has to comply with a covenant after the reporting period. However, if the entity's right to defer settlement of a liability is subject to the entity complying with covenants within twelve months after the reporting period, an entity discloses information that enables users of financial statements to understand the risk of the liabilities becoming repayable within twelve months after the reporting period. This would include information about the covenants (including the nature of the covenants and when the entity is required to comply with them), the carrying amount of related liabilities and facts and circumstances, if any, that indicate that the entity may have difficulties complying with the covenants.

The amendments are applied retrospectively for annual reporting periods beginning on or after January 1, 2024

**Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures—Supplier Finance Arrangements**
The amendments add a disclosure objective to IAS 7 stating that an entity is required to disclose information about its supplier finance arrangements that enables users of financial statements to assess the effects of those arrangements on the entity's liabilities and cash flows. In addition, IFRS 7 was amended to add supplier finance arrangements as an example within the requirements to disclose information about an entity's exposure to concentration of liquidity risk.

The term 'supplier finance arrangements' is not defined. Instead, the amendments describe the characteristics of an arrangement for which an entity would be required to provide the information.

To meet the disclosure objective, an entity will be required to disclose in aggregate for its supplier finance arrangements:

- The terms and conditions of the arrangements
- The carrying amount, and associated line items presented in the entity's statement of financial position, of the liabilities that are part of the arrangements
- The carrying amount, and associated line items for which the suppliers have already received payment from the finance providers
- Ranges of payment due dates for both those financial liabilities that are part of a supplier finance arrangement and comparable trade payables that are not part of a supplier finance arrangement
- Liquidity risk information

The amendments, which contain specific transition reliefs for the first annual reporting period in which an entity applies the amendments, are applicable for annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted.

**Amendment to IFRS 16 Leases—Lease Liability in a Sale and Leaseback**
The amendments to IFRS 16 add subsequent measurement requirements for sale and leaseback transactions that satisfy the requirements in IFRS 15 to be accounted for as a sale. The amendments require the seller-lessee to determine 'lease payments' or 'revised lease payments' such that the seller-lessee does not recognise a gain or loss that relates to the right of use retained by the seller-lessee, after the commencement date.

The amendments do not affect the gain or loss recognised by the seller-lessee relating to the partial or full termination of a lease. Without these new requirements, a seller-lessee may have recognised a gain on the right of use it retains solely because of a remeasurement of the lease liability (for example, following a lease modification or change in the lease term) applying the general requirements in IFRS 16. This could have been particularly the case in a leaseback that includes variable lease payments that do not depend on an index or rate.

As part of the amendments, the IASB amended an Illustrative Example in IFRS 16 and added a new example to illustrate the subsequent measurement of a right-of-use asset and lease liability in a sale and leaseback transaction with variable lease payments that do not depend on an index or rate. The illustrative examples also clarify that the liability, that arises from a sale and leaseback transaction that qualifies as a sale applying IFRS 15, is a lease liability.

The amendments are effective for annual reporting periods beginning on or after 1 January 2024. Earlier application is permitted.

4. Significant Accounting Judgments and key Sources of Uncertainty Estimates

Preparation of the consolidated financial statements and application of the accounting policies require the Bank's management to make judgments, estimates, and assumptions that affect the amounts of financial assets and financial liabilities and to disclose potential liabilities. Moreover, these estimates and judgments affect revenues, expenses, provisions, in general, expected credit losses, as well as changes in fair value that appear in the consolidated statement of comprehensive income and within shareholders' equity. In particular, the Bank's management requires judgments to be made to estimate the amounts and timing of future cash flows. These estimates are necessarily based on multiple hypotheses and factors with varying degrees of estimation and uncertainty. Meanwhile, the actual results may differ from estimates due to the changes arising from the conditions and circumstances of those estimates in the future.

Judgments, estimates, and assumptions are reviewed periodically. Moreover, the effect of the change in estimates is recognized in the financial period in which the change occurs if the change affects only the financial period. On the other hand, the effect of the change in estimates is recognized in the financial period in which the change occurs and in future periods if the change affects the financial period and future financial periods. Management believes that its estimates in the consolidated financial statements are reasonable. The details are as follows:

**Signification Judgement for the Implementation of the Bank's accounting policies**

The following are the key judgements, other than the estimates (disclosed below), which has been used by the management in the implementation of the Bank's accounting policies that has a significant impact on the recognized amounts in the consolidated financial statements.

Evaluation of the business model

The classification and measurement of financial assets depend on the results of the principal, interest payments test on the principal outstanding, and the business model test. The Bank defines a business model at a level that reflects how the groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment that reflects all relevant evidence, including how to assess the performance of the assets and measure their performance, the risks that affect the performance of assets and how they are managed, and how asset managers are compensated. The Bank monitors financial assets measured at amortized cost or fair value through other comprehensive income and derecognized before maturity to understand the reason for derecognition, and whether the reasons are consistent with the objective of the business held. In this respect, control is part of the Bank's continuous assessment of whether the business model under which the remaining financial assets are retained is appropriate, and whether it is inappropriate if there is a change in the business model, and therefore, a future change is made in the classification of those assets.

Significant increase in credit risk

The expected credit loss is measured as an allowance equivalent to the expected credit loss of 12 months for the assets of the first stage, or the credit loss over the life of the assets of the second or third stage. The asset moves to the second stage if credit risk increases significantly since initial recognition. IFRS (9) does not specify what constitutes a significant increase in credit risk. In assessing whether the credit risk of any asset has increased significantly, the Bank takes into account reasonable and reliable quantitative and qualitative information. The estimates used by the Bank's management concerning the significant change in credit risk that result in a change in the classification within the three stages (1, 2 and 3) are shown in details in note (40).

Establishing groups of assets with similar credit risk characteristics
When the expected credit losses are measured on a collective basis, the financial instruments are grouped on the basis of common risk characteristics (e.g. instrument type, credit risk, collateral type, initial recognition date, remaining maturity period, industry, borrower's geographic location, etc.). The Bank monitors the appropriateness of credit risk characteristics on an ongoing basis to assess whether they are still similar. This is required to ensure that, in the event of a change in the credit risk characteristics, the asset is properly reallocated. This may result in the creation of new portfolios or the transfer of assets to an existing portfolio that better reflects the credit risk characteristics of that group of assets.

Re-division of portfolios and movements between portfolios
The re-division of portfolios and movements between portfolios is more common when credit risk increases significantly (or when such a large increase is reflected). Therefore, assets are transferred from expected credit losses of between (12) months to another portfolio or vice versa. However, this may happen within the portfolios that continue to be measured on the same basis as expected credit losses for a 12-month period or a lifetime, but the amount of the expected credit loss changes due to the varying credit risks of portfolios.

Models and assumptions used
The Bank uses various models and assumptions in measuring the fair value of financial assets as well as in assessing the expected credit loss described in note (40). The judgment is applied when determining the best models for each type of asset as well as for the assumptions used in those models, which include assumptions regarding the main drivers of credit risk.

a. Classification and measurement of financial assets and liabilities

   The Bank classifies financial instruments or components of financial assets at initial recognition either as a financial asset or a financial liability, or as an equity instrument in accordance with the substance of the contractual agreements and the definition of the instrument. The reclassification of a financial instrument is subject to the substance of the financial statements and not to its legal form.

   The Bank shall determine the classification at initial recognition and reassess such determination, if possible and appropriate, at each date of the consolidated statement of financial position.

   When measuring financial assets and liabilities, certain assets and liabilities of the Bank are re-measured at fair value for financial reporting purposes. In assessing the fair value of any assets or liabilities, the Bank uses available observable market data. In the absence of Tier 1 inputs, the Bank conducts evaluations using professionally qualified independent evaluators. Moreover, the Bank works closely with qualified external evaluators to develop appropriate valuation and data valuation techniques.

b. Fair value measurement

   If the fair values of financial assets and financial liabilities included in the consolidated statement of financial position cannot be obtained from active markets, these fair values are determined using a range of valuation techniques involving the use of accounting models. If possible, the entered data for those models will be extracted from the market data. In the absence of such market data, fair values are determined by making judgments. These provisions include liquidity considerations and model data such as derivative volatility, longer-term discount rates, pre-payment ratios and default rates on asset-backed securities. Management believes that the valuation techniques used are appropriate to determine the fair value of financial instruments.

c. Derivative financial instruments

The fair values of derivative financial instruments measured at fair value are generally obtained by reference to quoted market prices, discounted cash flow models and, where appropriate, recognized pricing models. In the absence of prices, fair values are determined using valuation techniques that reflect observable market data. These techniques include comparison with similar instruments at observable market prices, discounted cash flow analysis, pricing option models, and other valuation techniques commonly used by market participants. The main factors that Management takes into consideration when applying the model are:

- The expected timing and probability of future cash flows on the instrument where such cash flows are generally subject to the terms of the instrument, although Management's judgment may be required where the counterparty's ability to repay the instrument in accordance with contractual terms is in doubt; and

- An appropriate discount rate for the instrument. Management determines the instrument discount rate at a rate higher than the non-risk rate. In assessing the instrument by reference to comparative instruments, Management considers the maturity, structure, and degree of classification of the instrument based on the system in which the existing position is compared. When evaluating tools on a model basis using the fair value of the main components, Management also considers the need to make adjustments for a number of factors, such as bid differences, credit status, portfolio service costs, and uncertainty about the model.

Determining the duration of the lease

When determining the duration of the lease, management takes into account all the facts and circumstances that create an economic incentive extension option, or no termination option. Extension options (or periods following termination options) are included only in the lease term if the lease is reasonably assured that it will be extended (or not terminated). The evaluation is reviewed in the event of a significant event or significant change in the circumstances affecting this assessment that are under the control of the tenant.

**Key Sources of Uncertainty Estimates**

The principal estimates used by Management in applying the Bank's accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are as follows:

Determining the number and relative weight of scenarios of the outlook for each type of product / market and the identification of future information relevant to each scenario

When measuring the expected credit loss, the Bank uses reasonable and supported future information based on the assumptions of the future movement of the various economic engines and how these affect each other.

Probability of default

The potential for default is a key input in measuring the expected credit loss. The probability of default is an estimate of the probability of default over a given period of time, which includes the calculation of historical data, assumptions, and expectations relating to future circumstances.

Loss given default

Loss given default is an estimate of the loss arising from default. It is based on the difference between the contractual cash flows due and those that the financer expects to collect, taking into account cash flows from collateral and integrated credit adjustments.

Fair value measurement and valuation procedures

When estimating the fair value of financial assets and financial liabilities, the Bank uses available observable market data. In the absence of level (1) inputs, the Bank conducts evaluations using appropriate valuation models to determine the fair value of financial instruments.

Provision for expected credit losses

Management is required to use significant judgments and estimates to estimate the amounts and timing of future cash flows and assess the risks of a significant increase in credit risk for financial assets after initial recognition and future measurement information for the expected credit losses. The most important policies and estimates used by the Bank's management are detailed in Note (40).

Impairment of Seized Assets

Impairment in the value of properties acquired is recognized based on recent real estate valuations by qualified independent evaluators for calculating the asset impairment, which is reviewed periodically. Furthermore, any decrease in its value is recorded in the consolidated statement of profit or loss and consolidated comprehensive income while no increase in its value is recorded as revenue.

In accordance with central Bank of Jordan’s generalization (10/3/16234) dated October 10, 2022, the calculation of the gradual provision for the foreclosed assets against debts has been suspended. Provided that the allocated provisions for the expropriated foreclosed assets in violation of the terms included in the banking low maintained, and that only the allocated provision is released against any of the violating real estate that are disposed of.

Productive lifespan of tangible assets and intangible assets

The Bank’s management periodically recalculates the useful lives of tangible assets and intangible assets for calculating annual depreciation and amortization based on the general condition of those assets and estimated future useful lives. The impairment loss is recognized in the consolidated statement of profit or loss for the year.

Income tax

The fiscal year is charged with income tax expense in accordance with accounting regulations, laws, and standards. Moreover, deferred tax assets, liabilities, and provision are recognized.

Provision for lawsuits

A provision for lawsuits is taken to meet any legal obligations that might arise based on the legal study prepared by the Bank's legal advisor. The study identifies risks that might occur in the future and is reviewed periodically.

Assets and liabilities at cost

Management periodically reviews the assets and liabilities at cost for estimating any impairment in value, which is recognized in the consolidated statement of Profit or Loss for the year.

Lease Extension and Termination Options

Extension and termination options are included in a number of leases. These conditions are used to increase operational flexibility in terms of contract management. Most of the held extension and termination options are renewable by both the Bank and the lessor.

Discounting rental payments

Lease payments are discounted using the Bank's incremental borrowing rate ("IBR"). Management applied the judgments and estimates to determine the incremental borrowing rate at the start of the lease

Listing the Future Outlook Information:

The Bank's management uses the future available information without any unjustified effort or cost for their evaluation on the significant increase in the credit risk, in addition during its measure for the expected credit losses indicator. The Bank uses the external and internal information to prepare the basic scenario for the future expectations of the related economic variables, including a presentable group of the other probable expectation scenario. The used external information includes the economic data and the expectations issued by the governmental bodies and the monetary authorities.

The Bank management conducts the expectations on the determined expected scenarios. The base scenario which is the only most likely result that includes the information used for strategic planning and budgeting. The Bank has determined and documented the main indicators for the credit risks and credit losses related to each financial instrument, noting that using statistical analysis of the historical data it has estimated the relationship between the macroeconomics, credit risks, and the credit losses.

The Bank re-examined the macroeconomic models using an efficient macroeconomic model. and documented the main macroeconomic factors which lead to a change in the payment default rates for each financial instrument. The Banks has used the macroeconomic data and expectations form Moody's macro-economic models system was issued by the governmental and monetary authorities such as the Central Bank of Jordan, the International Monetary Fund, and the National Bank to merge the future outlook information in the probability of default model for each scenario.

The expected relationships between the key macroeconomic factors and the payment default rates for the concerned financial instruments based on the historical data analysis for the prior five years period. The models are controlled and reviewed to ensure from its adequacy as at the end of each report period.

The table below summarizes the key macroeconomic factors included in the economic scenarios used on December 31, 2023 for the years from 2024 to 2028, for the Hashemite Kingdom of Jordan, which is the main country in which the Bank operates, and therefore it is the country which has a significant impact on the expected credit losses. As the changes below summarize the rate of change of the economic indicator in subsequent years compared to the value of economic indicator for the base year December 31, 2023 and cumulatively.

| The Percentage of change (Growth or contraction expected in output Gross Domestic (GDP) Compared to the base year | 2024 | 2025 | 2026 | 2027 | 2028 |
|---|---|---|---|---|---|
| | % | % | % | % | % |
| Base case scenario | 2.4 | 5.1 | 7.6 | 10.1 | 12.9 |
| Positive scenario | 5.1 | 8.6 | 11.2 | 13.5 | 16.3 |
| Inverse scenario | -2.2 | -0.9 | 1.6 | 4.3 | 7.0 |

| The Percentage of change (Growth or contraction expected in output Share Price Compared to the base year | 2024 | 2025 | 2026 | 2027 | 2028 |
|---|---|---|---|---|---|
| | % | % | % | % | % |
| Base case scenario | -1.7 | 0.6 | 6.2 | 12.0 | 16.3 |
| Positive scenario | 4.9 | 4.8 | 9.4 | 13.7 | 18.0 |
| Inverse scenario | -26.8 | -20.4 | -6.7 | 3.2 | 7.1 |

The Bank has conducted a sensitivity analysis for the corporate facilities portfolio on how the expected credit losses change for the major portfolios if the main assumptions for the calculation of the change of the expected credit extracted from the system (ECL Engine) without applying any excesses (override).

The table below summarizes the total expected credit losses for each portfolio as of December 31, 2023, in case those assumptions remain as expected, in addition if all of these used main assumptions change by 5% increasingly or decreasingly. The changes are applied individually, and it is applied on each weighted scenario based on the probabilities used to estimate the expected credit losses for stage one and stage 2. In fact, there will be a correlation between different economic data, and the exposure to sensitivity will vary with the variation of the economic scenarios.

| 2023 | Balances and deposits at Banks and Financial Institutions | Financial assets at fair value through other comprehensive income | Financial assets at amortized cost | Direct credit facilities | Indirect credit facilities (contingent liabilities) | Other asset |
|---|---|---|---|---|---|---|
| | JD | JD | JD | JD | JD | JD |
| Gross Domestic Product (GDP) | | | | | | |
| 5% | 19,532 | 7,544 | 12,392 | 3,981,855 | 477,472 | - |

| International Visa fees | 763,043 | 297,957 |
| Other | 531,175 | 582,750 |
| | 10,279,830 | 9,052,186 |

## 36. Earning per Share for the Bank's Shareholders

The details of this item are as follows:

| | 2023 | 2022 |
|---|---|---|
| | JD | JD |
| Profit for the year | 5,000,420 | 6,669,832 |
| Weighted average of the number of shares | 110,000,000 | 110,000,000 |
| Basic and diluted earnings per share (JD/Fils) | -/045 | -/061 |

- The basic earnings per share from the profits for the year is equivalent to the diluted earnings per share from the profits for the year.

## 37. Cash and Cash Equivalent

The details of this item are as follows:

| | 2023 | 2022 |
|---|---|---|
| | JD | JD |
| Cash and balances with the Central Bank maturing within three months | 81,043,680 | 59,743,320 |
| Add: Balances at banks and financial institutions maturing within 3 months | 162,404,948 | 116,667,469 |
| Less: Banks and financial institutions' deposits maturing within 3 months | (129,840,525) | (137,092,254) |
| | 113,608,103 | 39,318,535 |

## 38. Derivatives

The following schedule represents the positive and negative fair value of financial derivatives, and the distribution of their nominal value avccording to their maturity:

| | | | | Nominal Value Maturity, according to Maturity Dates | | | |
|---|---|---|---|---|---|---|---|
| | Positive Fair Value | Negative Fair Value | Total Nominal Value | Within 3 months | 3 - 12 months | 1 - 3 years | More than 3 years |
| | Thousand JD | Thousand JD | Thousand JD | Thousand JD | Thousand JD | Thousand JD | Thousand JD |
| 2023 | | | | | | | |
| Foreign currencies derivatives held for trading | - | 96 | 51,680 | 51,680 | - | - | - |
| Hedge interest rate swap contracts | - | (384) | 13,826 | - | 3,545 | 3,545 | 6,736 |
| | - | (288) | | | | | |
| 2022 | | | | | | | |
| Foreign currencies derivatives held for trading | (3) | 200 | 59,466 | 41,741 | 17,725 | - | - |
| Hedge interest rate swap contracts | - | (466) | 10,635 | - | - | 7,090 | 3,545 |
| | (3) | (266) | | | | | |

The nominal value represents the value of the current transaction for the year-end, and it does not reflect market risk and credit risk.

39. Balances and Transactions with Related Parties

The consolidated financial statements includes the Bank's financial statements and the following subsidiary company:

| Company's Name | Ownership Percentage | Paid-up Capital 2023 | Paid-up Capital 2022 |
|---|---|---|---|
| | % | JD | JD |
| Arab Co-operation for Financial Investments Company | 100 | 15,600,000 | 15,600,000 |

All the balances and transactions between the Bank and the subsidiary company were eliminated.

The bank entered into transactions with parent company, sister companies, senior management and the subsidiary company within the Bank's ordinary course of buisness using commercial interest and commission rates. All credit facilities granted to related parties are performing loans and no provisions were booked against it.

The details for this item are as follows:

* Interest rates on credit facilities range from 3% to 7.5%, and interest rates on customers' deposits range from 0.01% to 6.99%.

** In addition to what was disclosed in the above table, the total balance of the credit facilities provided to the Bank's related parties, which relates to 120 clients, amounted to JD 6,692,133 as of December 31, 2023, against acceptable guarantees amounted to JD 4,604,431 as of December 31, 2023. The interest rates income on these credit facilities range from 2% to 14%, while the commission rates range from 0.5% to 1%.

The following summarized the Bank's Executive Management's Remunerations:

| | For the Year Ended December 31, 2023 | For the Year Ended December 31, 2022 |
|---|---|---|
| | JD | JD |
| Salaries and bonuses | 2,861,702 | 2,943,656 |
| Total | 2,861,702 | 2,943,656 |

## 40. Risk Management

Based on the importance of managing the various risks that surround the Bank's business activities to which the Bank is or may be exposed in the future, the Bank continues to follow a risk management strategy in line with the direction of the Board of Directors, senior management, legislations, and laws issued by the Central Bank of Jordan, as well as with the policies and procedures of the parent institution in Bahrain, where the best international practices and the latest methods and techniques of risk management are applied. Moreover, risk management at the Bank is directly linked to the risk Management Committee of the Board of Directors.

The risk management process involves identification, measurement, evaluation and monitoring of financial and non-financial risks that can negatively affect the overall performance of the Bank.

It is the responsibility of senior management to determine the main principles of risks and the amount of risks that the Group can accept, as well as their optimal distribution to the Bank's various business activities and sectors. During 2023, the internal capital adequacy assessment process ICAAP, which included an assessment of the level of internal capital adequacy, legal liquidity ratios, was continued on the basis of the expected business strategy for the next three years.

The Bank has been able to maintain a high level of capital adequacy as well as a comfortable liquidity ratio in anticipation of any stressful situations that may occur. It has also been able to maintain the Bank's durability according to ICAAP and Basel III requirements and to keep up with any modifications to the Basel requirements.

The Central Bank of Jordan (CBJ) has released the Stress Testing Instructions, hence the bank has developed a methodology, policy and procedure approved by the Board Risk Committee in order to apply these instructions, where Stress testing is considered a key element in risk management process at various level, as follows:

- A key tool for understanding the bank’s risk system (Risk Profile) and its ability to withstand the shocks and high risks that it may face.
- An important part of the capital planning process through Internal Capital Adequacy Assessment Process (ICAAP).
- Help the bank to estimate the size of future capital that must be available in the coming years in accordance with its established strategy.
- An important part of identifying, measuring, and controlling liquidity risks in order to assess the bank’s liquidity and the adequacy of liquidity shocks mitigating tools.

These tests are designed to assess the bank’s financial situation in stress but possible scenario, where the necessary reports have been made and submitted to the Board Risk Committee, which adopt the assumptions and scenarios used, discuss the results of the tests, and adopt the actions to be taken based on these results.

**Governance of Stress Testing**

Stress testing must be a key part of risk governance and risk management culture of the bank in order to enhance the ability of the bank to identify and control risks.

**The Role of the Board of Directors:**

- The board of directors must ensure the existence of an effective framework for stress testing to evaluate the ability of the bank to withstand shocks and confront high risks. In this regard, the stress testing program at the bank will be the ultimate responsibility of the board of directors, and approve of the related policies and procedures.

- The board of directors must verify that the risk management department conducts the stress tests on a periodic basis. The board of directors must have a major role in setting the assumptions and the scenarios used, analyzing the stress testing results, and approving the procedures to be implemented based on the stress testing outcomes.

**The Role of the Senior Executive Management:**

- Executing and monitoring the stress testing program and in line with the methodology adopted by the board of directors which is in line with the determined stress testing based on the Central Bank of Jordan instructions.
- Ensuring the availability of a qualified staff at the risk management department to conduct the stress testing and that the department does possess the appropriate tools and means for the tests.
- Ensuring the availability of a suitable number of possible scenarios that are related to the business of the bank, given that these scenarios are well- understood and documented.
- Using the results of the stress testing in setting and identifying the bank's risk appetite statement, and in planning for capital and liquidity.

**The Role of the Risk Management:**
To adopt the Central Bank of Jordan instructions related to the design of stress testing program and use of forms and methodologies to determine their impact on the bank to cover, but not be limited to, the following aspects:

- Stress testing must encompass scenarios ranging from the lowest impact to the highest impact
- Making sure that the tests cover all the complex financial products as needed
- Taken into consideration the possible changes in the market circumstances that might adversely impact the bank's exposure to concentration risks
- Stress testing shall include scenarios to evaluate the size and impact of the off- balance sheet assets on other types of risks
- including some scenarios that are related to the reputational risks in stress testing, by reflecting the risks outcome which may have an impact of the Bank's reputation and in which it also reflects on the Bank's liquidity, its liquid assets, through withdrawals of deposits by some customers.
- The tests used must be appropriate to the degree of risk appetite that the bank has set for itself so that the scenarios selected by the bank commensurate with the size, nature, and complexity of the bank's business as well as the risks associated with the bank.
- The stress testing program must include both quantitative and qualitative methods to improve the comprehensiveness of these tests and make them supportive and complementary to the patterns and approaches of risk management used in the bank.
- The tests must range from simple sensitivity tests that are based on the change(s) in a single risk factor analysis sensitivity and to scenarios that are based on statistical methods which take into consideration the relationships among the drivers of systemic risks in times of crises, noting that the part related to scenario analysis is annually determined by the Central Bank of Jordan.
- Set a suitable dialogue format among the various related parties in order to obtain their views and opinions regarding the possible shocks and stressful situations in case of its occurrence so that it can then identify the assumptions and scenarios suitable for the internal and external risks that the bank might be exposed to. All concerned parties in the bank, such as Compliance Department, Internal Audit Department, Central Operation Department, Legal Department and Businesses Departments and others involved must participate in this dialogue in order to identify the possible shocks for Operational Risk on an annual basis and according to the instructions of the Central Bank of Jordan.
- The results of the tests should be submitted to the Local Assets and Liability Committee and the local Board Risk Committee, and the Risk Committee stemmed by the Bank's Board of Directors and on an annual basis.

**The Role of the Internal Audit:**
The internal audit department is responsible for reviewing and evaluating the stress testing framework at least once a year, and the evaluation outcomes are reported and revied by the board of directors.

During the year 2023, the Bank has reviewed and updated all the risk policies over the determined period for this, so that it ensures all the monitoring and internal requirements to be adopted by the Board of Directors, noting that the Bank ensures to conduct a periodic review of the various policies in order to confront with the surrounding risks and to limit from their impact.

During the year 2023, the bank has continued to apply IFRS requirements as adopted by central Bank of Jordan through applying the methodology approved by the parent company in Bahrin after adjusting it to be inline with Central Bank of Jordan requirements and the parent company in Bahrin instructions in this regard.

In addition, the Bank depends on output Solution for the purposes of preparing the required reports and disclosures within the bank's final financial statements of the year 2023, where these results were presented to the Board of Directors and the Risk Committee stemmed by the Board of Directors and the concerned Bank's local Committees. The following gives a brief introduction to this methodology:

**First: Definition of the Bank's implementation of default and the mechanism of Default Treatment**

The Bank follows and applies the Central Bank of Jordan's Instructions No. (2009/47) dated December 10, 2009 for the classification of the non-performing accounts for the outstanding Bank's credit portfolio, where it classifies the non-performing debts and interest in suspense automatically within the used Bank's system, and according to the classifications included in the instructions (sub-standard, doubtful debts, and loss debts).

1) Bank's application of default:
   The Central Bank of Jordan's instructions are applied with regards to the classification of impaired debts and suspension of interest. As for provisions, the Central Bank of Jordan's instructions and the internal Bank's policies are applied, whereby the most conservative results are taken.

2) Mechanism of default treatment:
   - Rescheduling of debts according to the rescheduling principles outlined in the instructions of the Central Bank of Jordan.
   - Final payments and deducting part of the debt.
   - Following the legal procedures to collect the Bank's rights.
   - Manually transferring non-performing accounts to performing accounts.

- Taking into consideration the instructions of the Central Bank of Jordan and the internal policy adopted by the Bank, where the more conservative and strict procedures are adopted. The classification of risk ratings for non-performing accounts is adopted as follows:

| Classification Segment | Internal Classification for Non-performing Facilities |
|---|---|
| Sub-standard | 9 |
| Doubtful debts | 10 |
| Loss debts | 11 |

**Second: Detailed explanation of the Bank's internal credit classification system and its working mechanism**

The Bank evaluates corporate customers based on Moody’s- Credit Lens internal evaluation system. Moreover, the evaluation relies on the evaluation of the financial elements and the non-financial elements where the financial statements relating to the results of corporate clients are entered into the internal rating system when granting, reviewing, or modifying the ceilings of the facilities granted to the client within the ratios and financial indicators specified on the system. In addition, there are standards and non-financial requirements entered into the system to extract the customer’s degree of risk classification based on the risk classification degree listed below. This degree is entered through the Bank’s system, indicating that the classification degrees 7 & 8 also include watch-list facilities accounts. On the other hand, the classification ratings of (9, 10, and 11) relate to the non-performing facilities accounts based on the Central Bank of Jordan’s Instructions No. (47/2009). In this respect, the classification related to the watch list and non-performing accounts are performed automatically in the system.

| Internal Risk Grade | Description |
|---|---|
| 1 | Exceptional |
| 2 | Excellent |
| 3 | Superior |
| 4 | Good |
| 5 | Satisfactory |
| 6 | Adequate |
| 7 | Marginal/Watch list |
| 8 | Special mention |
| NPLs (9,10 &11) | Sub-Standard, Doubtful and Loss |

**Third: Mechanism adopted for calculating the expected credit losses (ECL) based on financial instruments for each individual item.**

- The expected credit losses are calculated based on financial instruments classified under the amortized cost portfolio or through the other comprehensive income statement based on an individual basis, on debt instruments. The calculation is performed according to the Treasury Department’s business model adopted by the Bank’s Board of Directors, where these tools are subject to impairment calculation (Expected credit losses) according to IFRS (9) requirements. Meanwhile, loss is recorded in the consolidated statement of Profit or Loss.

- The debt instruments issued or guaranteed by the Government of Jordan are excluded from the expected credit loss.

**Fourth: Regulatory requirements for the implementation of International Financial Reporting Standard (9) including the responsibilities of the Board of Directors and Executive Management in ensuring compliance with the said requirements.**

- The Bank’s Board of Directors shall adopt the policies and documents relating to the standards, methodologies, and the basis for calculating the requirements of IFRS (9) according to the Central Bank of Jordan’s instructions, including periodically reviewing the results of the expected credit losses calculation and standing up on the developments and updates related to these results, in addition to the basis and other matters related to the calculation.

- The Board of Directors approves any exceptional case in which an allowance is made or expected credit losses are taken, and the adjustments concerning the expected credit losses calculation results according to clear and reliable justifications.

- The Bank's Steering Committee for managing the application of IFRS (9) is chaired by the CEO, and its membership consists of each of the heads of the executive departments concerned with the application. The members represent the heads of the business units, backing and support group, risk management, financial control, and information system management. This Committee supervises the application of IFRS (9) requirements, and is responsible for applying it to ensure that the concerned departments shall implement this plan according to the competence of each to comply with the roles assigned; implement the procedures related to the implementation steps and stages of applying this standard in the Bank; present the completion results once ready; and coordinate with the various credit committees in the Bank to obtain the necessary approvals for the cases that require an adjustment to the results of calculating the volume of the expected losses, and reviewing the result of calculating the volume of credit facilities.

- The Credit Committee presents and reviews the list of accounts that need to be monitored closely and under control in order to verify that the size of the provisions calculated are in accordance with the required standard commensurate with the credit risk related to these accounts.

- The requirements of IFRS (9) has been implemented through the Arab Banking Corporation/parent company in Bahrain. Moreover, agreement has been reached d to apply this standard at the Group's level through Moody's Company.

**Fifth: Definition of the mechanism for calculating and controlling the probability of default (PD), credit exposure at default (EAD), and loss given default (LGD).**

- According to IFRS(9), the expected credit loss measurement model has been applied using the following framework:
  Expected Credit Losses = Credit Exposure at Default * Probability of Default * Loss Given Default.

- Credit exposure is calculated according to the Central Bank of Jordan's instructions as follows: loans and credit facilities (direct and indirect), debt instruments recorded at amortized cost, debt instruments recorded at fair value through the statement of comprehensive income, financial guarantees, credit exposures to bank and financial institution, the unutilized direct limits, taking into consideration the conversion factor for indirect requirements. A rate of 100% has been adopted for calculating the exposure at default.

- The Probability of Default ratios have been calculated according to the results of the evaluation of the risk degree of the credit portfolio of the customers during the past years. Moreover, the required review has been conducted regarding the customer's risk assessment forms for all corporates and banks through Moody's system according to the following table:

| Moody's Rating | Notch | ABC – Rating |
|---|---|---|
| Aaa | 1 | 1 |
| Aa1 | 2 | 2+ |
| Aa2 | 3 | 2 |
| Aa3 | 4 | 2- |
| A1 | 5 | 3+ |
| A2 | 6 | 3 |
| A3 | 7 | 3- |
| Baa1 | 8 | 4+ |
| Baa2 | 9 | 4 |
| Baa3 | 10 | 4- |
| Ba1 | 11 | 5+ |
| Ba2 | 12 | 5 |
| Ba3 | 13 | 5- |
| B1 | 14 | 6+ |
| B2 | 15 | 6 |
| B3 | 16 | 6- |
| Caa1 | 17 | 7+ |
| Caa2 | 18 | 7 |
| Caa3 | 19 | 7- |

| | | |
|---|---|---|
| Ca | 20 | 8 |
| | Sub-Standard | 9 |
| | Doubtful | 10 |
| | Loss | 11 |

- The loss given default ratio is calculated using the systems approved by the external supplier of Moody's company, assuming that the default happens after calculating the recoverable amount of the credit exposure and the timing of the recovery, taking into consideration the collaterals provided against the credit exposure and the application of the deduction ratios determined in accordance with the internal standards adopted by the Bank.

- The methodology for calculating the expected credit loss in the stage one and two was adopted on a Collective Basis level for the retail portfolio (personal loans, housing loans, credit cards and auto financing loans). Moreover, the Roll Rate Approach was adopted. Such portfolios or products carry similar credit risk and share several elements such as (type of product, quality of collateral provided, nature of financing, duration of financing, sector, etc.)

- The stress tests required in accordance with IFRS (9), which is part of the expected credit loss calculation process, were adopted in three scenarios to study the future forecasts and their effect on the variables of the expected credit loss measurement model, represented by a base scenario, downside scenario, and upside scenario, since we have adopted the weighted probability value for these scenarios.

- As for the calculation of the credit loss under Stage 3, we continue to follow the Central Bank of Jordan's Instructions No. (47/2009) for the classification of non-performing debts, suspension of interest, calculation of provisions and acceptable haircut rates for collateral based on these instructions and the volume of credit losses are calculated based on IFRS 9 in which the more conservative is taken.

**Sixth: Determinants of the significant change in the credit risk on which the Bank relies for calculating the expected credit losses**

- A decrease or deterioration in the actual internal credit rating of the borrower according to the internal rating system applied by the Bank related to comparison with the internal rating of the borrower at the time of granting the loan.

- Accounts with no risk rating degree on the system at the facility granting and their current degree of risk rating 5+ or worse classified in stage two.

- The unpaid accruals on one of the client accounts or the borrower equal to or greater than 30 days.

- Accounts classified as watch list (internal ratings 7 and 8).

- Accounts that need to be actively monitored by the Bank within watchlist accounts.

- Accounts that have restructured the debtor's obligations (restructuring of obligations).

- As for the credit portfolio for retail facilities of all types, the customers' loans with dues for more than or equal to 30 and less than 90 days are classified in the stage two, in addition to the restructured accounts.

**Seventh: The Bank's policy in identifying the common elements (characteristics) on which the credit risk and expected loss are based on a collective basis**

- The methodology for calculating the expected credit loss in stage one and two was adopted at the Collective Base level for the retail portfolio (personal loans, personal loans against cash margins, housing loans, credit cards, and auto financing loans). Moreover, the Roll Rate Approach was adopted. Such portfolios or products carry similar credit risks and share several elements such as (type of product, quality of collateral provided, nature of financing, duration of financing, sector, etc.).

- The roll-rate approach was used to calculate the probability of default for retail products for each product based on the reports extracted from the Bank during the past years and monthly to determine the distribution of dues. The loss given default ratio was calculated by reference to the size of the realized recoveries of the NPL portfolio for each type of the retail portfolio, including the overdrawn account during the previous years.

- An independent and more detailed methodology was used in order to calculate the size of the expected credit loss for the credit portfolio granted by the bank's subsidiary "Arab Cooperation for Financial Investments", which is represented in financing shares within the product of margin financing and cash financing for the first stage, the second stage and the third stage, where it was considered The risk score of the operating portfolio clients classified within the first stage is one notch less than the country risk score (Jordan). As for the risk score of the client classified within the second stage, it was considered four notches lower than the country risk score (Jordan). As for the maturity of the facilities, the maturity date was considered based on the type of product and the stage of the exposure’s classification and as follows:

| Maturity period | Classification stage | **Product** |
|---|---|---|
| 3 Months | 1 | Cash Financing |
| | 2 | |
| Remaining maturity | 1 | Margin Financing |
| Contractual maturity or 2 years from reporting period whichever is greatest | 2 | |

As for the loss given default (LGD), a rate of 5% LGD Floor has been approved for facilities classified within the first stage (which was calculated according to the percentage of guaranteed coverage for existing facilities) and a rate of 10% LGD Floor for customers classified within the second stage. As for the classification of accounts of the third stage (defaulters). Therefore, the company adopts the approved internal policy in this regard.

**Eighth: Primary economic indicators used by the Bank in calculating the expected credit loss probability of default (PD)**

The parent institution in Bahrain used an external supplier to conduct the calculation of expected credit loss by adopting three scenarios to study the future forecasts and their impact on the variables of the credit loss measurement model. The economic factors used in the calculation were the economic growth ratios in Jordan and the stock price index in regards of the Company’s portfolio.

**The banking significant risk for the Group and management tools to handle it:**

**<u>(40/a) Credit Risk</u>**
Credit risk represents the other party's default or inability of the financial instrument to meet its obligations toward the Group which could result in a loss. The Bank divides the direct credit facilities portfolio into four sections comprising credit facilities for governments and financial institutions, including banks and companies, consisting of both corporate and medium size facilities; as well as retail facilities, including personal loans, housing loans and other products such as credit cards and personal car loans. These policies include rules and procedures that must be adhered to when granting or renewing facilities. They also include a special evaluation for each customer through rating, whereby CreditLens is currently used to classify the facilities of corporates and medium companies, and in which is performed automatically. In addition, a Credit Scoring model is adopted to assess customers included in the retail portfolio.

The Bank is also pursuing a policy of diversification at the level of customers, economic sectors and geographical regions, which contributes to reducing the degree of credit risk. In order to control the risks of lending, the Risk Management Committee of the Board of Directors holds periodic meetings to discuss all matters related to credit risk, and is provided with quarterly reports on the distribution of the facility portfolio in terms of economic distribution, credit rating, geographical distribution, tenor for facilities, volume of expected credit losses, review of the results of regulatory and internal capital adequacy ratios, and the results of stress testing and risk appetite limits, which determine the direction of the Bank in the upcoming period. The adequacy of the impairment provision for the credit facilities is reviewed periodically in accordance with the instructions of the Central Bank of Jordan. Moreover, the volume of expected credit losses is reviewed in accordance with IFRS (9).

The details of the direct credit facilities portfolio are stated in Note (8). In addition, the Group's off-balance sheet financial position obligations carrying credit risks are detailed in Note (40).

**Rescheduled Debts:**
These represent the debts pre-classified as non-performing credit facilities and derecognized as non-performing credit facilities according to assets rescheduling and recognized as stage 2 debts. The total rescheduled debts amounted to JD 823,826 during 2023 (JD 377,884 during 2022).

**Restructured Debts:**
Restructuring means rearranging the credit facilities through amending the installments, prolonging the facilities, postponing some other installments, extending the grace period, or classifying the credit facilities as debts under Watch list. Restructured debts totaled JD 36,526,261 including some accounts that have been restructured twice during the year totaling JD 15,870,051 as of December 31, 2023 (a giants of JD 38,680,087 as of December 31, 2022, including some accounts that have been restructured twice during the year with a total of JD 15,554,655).

1 - Credit Exposures Distributions

| Internal Rating for the Bank | Category Classification According to (2009/47) | Total Exposure Value | Expected Credit Loss | Probability of Default | Exposure when Default | Average Loss on Default |
|---|---|---|---|---|---|---|
| | | JD | JD | % | JD | % |
| 1 | Performing Loans | 13,226,149 | 11,257 | from 0.0003 to 0.0006 | 13,226,055 | from 0.2293 to 0.4434 |

The guarantees against the loans and facilities are as follows:

- Real Estate Mortgage
- Financial Instruments Mortgage, such as shares
- Bank Guarantees
- Cash Warranty
- Governmental Guarantee

The management observes the market value of collaterals periodically. In case there is a decline in the value of the collaterals, the Bank requests additional collaterals to cover the deficiency in value. In addition, the Group evaluates the collaterals against non-performing credit facilities on a periodic basis.

All Bonds listed above are classiffed within stage 1.

**(40/B) Market risk**

Market risk relates to the losses from the financial positions on- and off- the statement of financial position arising from the changes in interest rates, exchange rates, and shares' prices. Moreover, market risk is monitored and managed by the Market Risks Department related to the Risk Management Department, in addition to other committees and regulatory entities, including the Assets and Liabilities Committee and Risk Management Committee which comprises of some members of the Board of Directors and the Risk management supervisors.

The Bank manages market risks from the Bank's investments in bonds and shares, exchange of foreign currencies swap contracts, and certificates of deposit using multiple advanced techniques in order to achieve comprehensive management for this kind of risks such as VaR (Value at Risk) which the Bank calculates daily, in a way that includes all the Bank’s portfolios subject to risks (Interest rates instruments, Equity instruments for trade, and the foreign currencies centers), by using the (Historical Simulation) which is based on several assumptions such as calculation for one day (one-day time horizon) and a confidence level of 99%. In this respect, VaR results are compared daily with the portfolio realized profit and losses.

The Bank also calculates the effect of the sensitivity of the change in interest rates for the financial instruments that change in accordance with the change in interest rates; and for the main currencies that the Bank deals with according to Basis Point Value (BPV) based on calculating the expected possible losses for the change in interest rate at one basis point (DV01).

The table below shows the effect of the financial instruments exposures risks on the statement of Profit or Loss according to the sensitivity analysis if the interest rate declines by one percent:

For the year 2023

According to the financial instruments (BPV=DV01)

| Financial Instrument | DV01 value |
|---|---|
| | JD |
| Bonds | (46,727) |
| Gaps in bond's maturity | - |
| Finance Market | 37 |
| Interest / Currency swaps | 3,751 |

For the year 2022

According to the financial instruments (BPV=DV01)

| Financial Instrument | DV01 value |
|---|---|
| | JD |
| Bonds | (58,029) |
| Gaps in bond's maturity | - |
| Finance Market | 76 |
| Interest / Currency swaps | 1,399 |

The table below shows the effect of currency risk on the statement of Profit or Loss according to the sensitivity analysis if the currency rate declines by one percent:

For the year 2023

According to currencies

| Currency | DV01 value |
|---|---|
| | JD |
| Euro | (203) |
| Pound | (3) |

For the year 2022

According to currencies

| Currency | DV01 value |
|---|---|
| | JD |
| Euro | (451) |
| Pound | (5) |

**(40/C) Liquidity Risk**

Liquidity risk is the risk that the Bank will not be able to provide the necessary funding to meet its liabilities in its maturity dates due to the inability to liquidate the assets. To minimize these risks, the Bank's management diversifies its sources of funds, manages and aligns the maturities of assets and liabilities, and maintains a sufficient balance of cash and cash equivalents and securities available for trade.

Within the framework of the general strategy to achieve a return on its investments, the Bank reviews and manages liquidity at various levels, including the Treasury, Financial Audit Department, Risks Management Department, as well as the Assets and Liabilities Committee which is specialized in this regard. The cash flow review includes an analysis of the maturity profile of assets and liabilities in an integrated manner. It analyzes the sources of funds, which include customers, correspondent banks, affiliates and associates, the Bank's branches in Jordan, and the distribution and concentrations of customer deposits by sector.

The Bank follows a liquidity management strategy approved by the Board of Directors aimed at implementing a comprehensive concept for managing the liquidity risk and associated dependencies efficiently and effectively. It also takes into consideration the diversification and appropriate distribution between sources and uses of funds.

The liquidity contingency plan has been developed and approved and is an integral part of the liquidity risk management policy, which would be activated for the management of liquidity risk and in case the bank is exposed to any unexpected withdrawals of customers' deposits exceeding the accepted liquidity ratios.

The contractual maturity dates of the assets have been determined based on the remaining period from the date of the statement of financial position until the contractual maturity date regardless of the actual maturities reflected by historical events relating to maintaining deposits and the availability of liquidity.

The Bank complies with the instructions of the Central Bank of Jordan stipulating that the foreign currency ratios should not become lower than 100% and not less than 70% for the Jordan Dinar. In addition, the liquidity ratios are reserved at levels higher than the minimum imposed by the Central Bank of Jordan.

In the previous period, the Bank has conducted studies on the calculation of the size of the deposits (the Core Deposits) according to the historical behavior of the customers' deposits over the past five years and reflected the results of this study in the reports on the management of liquidity risk.

Liquidity Risk( 40/C)

Firstly: The table below summarizes the distribution of the liabilities (undiscounted) on the basis of the remaining contractual maturity period at the date of the financial statements:

| | Less than one month | 1-3 months | More than 3-6 months | More than 6 months-1 year | More than 1-3 years | More than 3 years | Without maturity | Total |

**(40/D) Operational risk**

Operational risk is defined as the risk of loss that might impact revenues or capital resulting from inadequate or failed internal procedures, information systems, human element, or due to external events that have tangible impact on the Bank's operations. Operational risk also includes legal risk, excluding reputation and strategic risk.

For reputation and other risks such as strategic and quantitative risks that directly relate to liquidity risks, the Bank calculates capital to face those risks through evaluating it according to the adopted Scorecard form.

The Operational Risks Department carries out continuous work and closely coordinates with all heads in charge within the general management department to ensure the continuation of implementing the concept of the Operational Risk Management Framework effectively through the implementation of the principle of the three lines of defense model, which define the tasks and responsibilities of all departments of the bank, especially with regard to the application , a follow-up and monitoring the execution of the daily tasks in the remit of the first line of defense.

The Operational Risk Department continues to gather the operational losses data in addition to the operational risks indicators through the GRC-Tool, it monitors and update and ensure from the formulation of any correction plan around it, wherever necessary. The system objective is to allow the utilization by all concerned departments whether business departments, risks compliance, in addition to internal audit, thus enabling Executive Management to be aware of financial and non-financial risks on spot.

The methodology for control-self assessment of operational risks and the controls set against it through conducting a review at departmental level, (Departments/branches/products/processes) Through which operational risks and the risks associated with them.

**(40/E) Information Technology Risk**

It is the risk that the Bank may face as a result of acquiring and using information technology resources to execute the Bank's operations that which may lead to financial losses, legal proceedings, or an adverse impact on the Bank's reputation or the services provided to the clients and related parties.

In order to enable the Bank's Risk Department to implement all the requirements stipulated in the Central Bank of Jordan's instructions relating to "governorship and management of information and associated technology", Central Bank of Jordan's instructions relating to "adapt to cyber risks", and policies and procedures stipulated by the Bank; and in order to complete the related work performed during 2022, the following points have been completed in 2023:

1. Renewing, updating and re-adopting the following policies and procedures:
   - IT Risk Policy.
   - Information and systems classification and protection policy.
   - IT Risk Assessment Mechanism.
   - IT risk department work procedures

2. Updating IT risk department work procedures by adding more details to the role of the IT risk department relating to monitor, analyse, and asses the risks which are managed by IT department, information security department, and business continuity department.

3. Updating the "Risk appetite statement and framework" document related to the acceptable risk limits and specifying the acceptable level for operational risks and cyber risks and obtaining the Board of Directors' approval thereon.

4. Preparing the reports as required in Central Bank of Jordan's instructions relating to "governorship and management of information and associated technology" and share them with the concerned parties by presenting them to the operational resilience Committee.

5. In order to develop the skills of IT risk management staff, those involved participated in many local conferences, training courses, and workshops related to IT governance and information security.

41. Segment Information

**A. Information on the Bank's business activities:**

For management purposes, the Bank is organized so that segments are measured based on reports used by the general manager and the key decision maker at the Bank throughout the following primary buisness segments:

- Retail banking.
- Corporate banking.
- Treasury.

The following represents the Bank's primary buisness segments information:

| | | | | | Total | |

## 42. Capital Management

a. The capital adequacy ratio as of December 31, 2023 and 2022 was calculated according to Basel III requirements where the Bank's regulatory capital consists of the Common Equity Tier1 (CET1) and Additional Tier 1 (AT1), and Tier 2 (T2)

b. The regulatory authorities' requirements regarding the Common Equity
The Central Bank of Jordan's instructions require that the minimum regulatory capital to be (12%) of the off-balance sheet assets weighted by risks, in addition to market risks and operational risks. This percentage is considered the minimum for capital adequacy, as the Bank is committed, in all cases, to maintaining an adequacy percentage above the minimum by an appropriate margin and in line with the requirements of BASEL III, as well.

c. Methods for achieving the capital management objectives
Capital management involves optimally employing sources of funds to achieve the highest return on capital possible within the acceptable risk limits approved by the Board of Directors, while maintaining the minimum limit required according to the laws and regulations in force. Moreover, the Bank follows a policy of striving to minimize costs of fund as much as possible through resorting to low-cost sources of funds, increasing the clients' base, and optimally employing such sources in investments with reasonable risks to achieve the highest possible return on capital.

d. Capital Adequacy

In addition to subscribed capital, capital includes the statuary reserve, voluntary reserve, share premium, retained earnings, cumulative change in fair value , general banking risk reserve, other reserves and treasury stocks.

The Bank is committed to applying the requirements set forth by regulators concerning capital adequacy as follows:

1- The Central Bank of Jordan's instructions requiring that capital adequacy ratio may not go below 12%.
2- Compliance with the minimum limit set for the paid capital for Jordanian banks such that it is not less than JD 100 million.
3- The Bank's investments in stocks and shares which should not exceed 50% of the subscribed capital.
4- The ratio of credit limits (credit concentration) to regulatory capital.
5- The banks and companies laws related to the deduction of the legal reserve at a rate of 10% of the Bank's profit before tax.

| | December 31, | |
|---|---|---|
| | 2023 | 2022 |
| **Common Equity Shareholders' Rights** | Thousand JD | Thousand JD |
| Paid-up capital | 110,000 | 110,000 |
| Retained earnings less proposed dividends | 20,502 | 19,425 |
| Cumulative change in fair value of financial assets | (123) | (1,082) |
| Share premium | 67 | 67 |
| Statuary reserve | 31,385 | 30,762 |
| Voluntary reserve | 197 | 197 |
| **Total Capital of Common Stock** | **162,028** | **159,369** |
| | | |
| **Regulatory amendment (deduction from capital)** | | |

| Other purchases contracts | 72,229 | 260,046 |
| **Total** | 4,819,655 | 5,229,946 |

## 45. Lawsuits raised against the Bank

Lawsuits against the Bank amounted to JD 4,503,987 as of December 31, 2023 (JD 4,479,454 as at December 31, 2022) and in the opinion of the bank's management and legal counsel the bank would not incur obligations in excess of the recorded provision which amounted to JD 109,376 as at December 31, 2023 (JD 109,376 as at December 31, 2022).

## 46. Fair Value Measurement

a. Fair value of financial assets and financial liabilities that are measured at fair value on a recurring basis:

Some financial assets and liabilities of the Bank are evaluated at fair value at the end of each fiscal period. The following table shows the information about how to determine the fair value of these financial assets and liabilities (evaluation methods and inputs used).

| Financial Assets | Fair Value December 31, 2023 | Fair Value December 31, 2022 | The Level of Fair Value | Evaluation Method and Inputs used | Significant Unobservable Inputs | Relationship of Unobservable Inputs to Fair Value |
|---|---|---|---|---|---|---|
| | JD | JD | | | | |
| **Financial Assets at Fair Value** | | | | | | |
| Financial Assets at Fair Value through Other Comprehensive Income: | | | | | | |
| Bonds | 76,288,863 | 130,951,882 | Level 2 | According to the latest available financial information | N/A | N/A |
| Quoted shares in active markets | 14,571,216 | 11,409,151 | Level 1 | Quoted prices in financial markets | N/A | N/A |
| Unquoted shares in active markets | 3,414,222 | 2,899,316 | Level 2 | According to the latest available financial information | N/A | N/A |
| Total | 94,274,301 | 145,260,349 | | | | |
| Total Financial Assets at Fair Value | 94,274,301 | 145,260,349 | | | | |
| Unrealized gains on financial assets | 384,065 | 465,904 | Level 2 | According to the latest available financial information | N/A | N/A |
| Financial liabilities | | | | | | |
| Unrealized losses on financial derivatives | 96,049 | 202,424 | Level 2 | According to the latest available financial information | N/A | N/A |
| Total liabilities at fair value | 96,049 | 202,424 | | | | |

There were no transfers between level 1 and level 2 during the year ended December 31, 2023.

B. The fair value of the financial assets and financial liabilities of the Bank (non-specific fair value on an ongoing basis:

Except for what is set out in the table below, we believe that the carrying amount of financial assets and liabilities shown in the consolidated financial statements of the Bank approximates their fair value:

| | December 31, 2023 | | December 31, 2022 | | The level of |
|---|---|---|---|---|---|
| | Book value | Fair value | Book value | Fair value | Fair Value |
| | JD | JD | JD | JD | |
| **Financial Assets of Non-specified Fair Value** | | | | | |
| Term deposits, and certificate of deposits at the Central Bank of Jordan | 31,500,000 | 31,506,257 | - | - | Level 2 |
| Current accounts, and balances at Banks and Financial Institutions | 180,157,598 | 180,620,482 | 124,200,619 | 124,549,655 | Level 2 |
| Direct credit facilities at amortized costs | 854,489,744 | 855,908,405 | 856,604,748 | 860,719,619 | Level 2 |
| Other financial assets at amortized costs | 212,456,866 | 215,894,118 | 169,224,488 | 171,783,500 | Level 2 |
| Total Financial Assets of Non-specified Fair Value | 1,278,604,208 | 1,283,929,262 | 1,150,029,855 | 1,157,052,774 | |
| **Financial Liabilities of Non-specified Fair Value** | | | | | |
| Banks' and Financial Institutions' deposits | 168,835,525 | 170,314,192 | 138,696,896 | 138,696,896 | Level 2 |
| Customers' deposits | 876,623,475 | 886,634,298 | 841,914,436 | 841,914,436 | Level 2 |
| Cash margin | 44,981,313 | 44,981,720 | 50,294,894 | 50,294,894 | Level 2 |
| Borrowed funds | 102,921,397 | 103,551,851 | 124,757,215 | 124,757,215 | Level 2 |
| Total Financial Liabilities of Non-specified Fair Value | 1,193,361,710 | 1,205,482,061 | 1,155,663,441 | 1,155,663,441 | |

## 47. Managed Accounts for Customers

The nominal value of the financial assets of the managed account for customers amounted to JD 313,278,281 as of December 31, 2023 against JD 255,560,000 as of December 31, 2022.
